## PROFESSIONAL MAKE-UP BRUSHES

An essential part of well-applied make-up is the proper tools, brushes comprise the largest part of those tools. Good brushes ensure that the desired application is achieved effectively and efficiently. We have designed our brushes specifically for our make-up in order to produce the best effect from our micronized mineral powders. The natural hair used in our brushes is obtained from living animals. (You should be aware that no animal is killed to make brushes.) The hair is a secondary item generally obtained from combing or brushing. The hair then undergoes several chemical-cleansing processes so that it is sterile enough to be used on the skin.
