

BEAUTY<sup>TM</sup>pack

### **BEAUTYPACK**

Beautypack is one single window for cosmetic packaging solutions located in New Delhi, India. We are a flagship company of SAAR GROUP OF INDUSTRIES, we started this new venture in year 2011, to produce product ranging from packaging solutions for skincare, body care and household products at a very competitive price. With extensive knowledge and persistence in perfection, we offer premium packaging quality products based on customer satisfaction, customizable service, and professional product consultancy.

#### **Best packaging solution is our mission**

Our mission is to provide foremost solution possible for every sort of packaging requirement. With Our dedicated team's persistent efforts, the sourcing for packaging components can be faster and easier, fulfilling it with our wide range of products. With in-house facility our R&D department customized options can be offered, to fulfill specific requirements and achieve customer satisfaction.

#### **Packaging levels up product value**

Beautypack has long term business alliance with many manufacturers in India. All of them have advanced production facility and a full integrated manufacturing system. Professional service, strict quality control, supplier management, and export logistics, are the standard operation protocol.

#### **Teamwork is the key to success**

At Beautypack family, we value team culture, where purchaser, QC, sales team and majorly our clients who plays important role to assist us with their feedbacks to improvise for future. It's the TEAM which makes us walking at the same pace and gets the best package solution done. Immense Care is taken to complete each project within stipulated time frame with most suitable packaging solution, best quality, and post-sales service.

#### **Evolution of product range**

Our products are designed to go with different dispensers such as, serum pump, dropper, lotion pump, mist pump & caps further which varies our products range from various colors & decoration available in multiple sizes & dispensers. We also undertake customization as per client's requirement with a nominal development cost.

#### **We believe in innovations**

In order to provide our customers an international standard product. Our company strives to improve and update the technology used to manufacture them on regular intervals. As to follow our moto we have chosen to shift our regular production raw material from PET to PET-G.

#### **Some benefits of using PET-G are as follows:**

1. Optical properties: It is a product with high transparency and high gloss which gives optimum look of the product.
2. Environmental approval: PET-G is BPA free, phthalate free product and it is approved by FDA/EFSA/NSF/JHOSPA, which means that it's an environmentally friendly product available in the market till date.
3. Flame resistance: Which means it is safer to use and has resistance to flame. It is a UL94V-2 certified product.
4. Physical properties: It has high impact strength. And having a good surface finish on the products, It's also an excellent printable product.
5. PET-G is resistant to chemical attack and stress cracking.

Remarks: Our company's only motive of using PET-G is to provide our customers a product which is safe, easy and environment friendly.
