Doors that augment your decor...

Geeta PLYBOARDS PVT. LTD., an ISO-9001: 2000 Company manufactures **Niki** range of Flush Doors, Decorative Veneer Doors, Moulded Panel Doors, Decorative PVC Doors, Engineered Wooden Panel Doors, Fire Retardant Doors, Door Frames & Door Jams, Modular Kitchen & Wardrobe Shutters, Block Boards & Plywood. With a rich experience of more than three decades in timber & its by-products, the company has a state-of-the-art manufacturing facility in Hyderabad. The vast acceptance of the **Niki** products by demanding architects, builders & end consumers is a testimony to its unrelenting commitment to quality products & processes. The company is privileged to be associated with world's leading manufacturer of Moulded Door Skins, M/s Masonite International, USA, as their authorised assembler & M/s Promat of Belgium, the world leader in Fire Systems as their OEM partner for the manufacture of Fire Retardant Doors with Wooden Frames. Our pursuit has been to offer products of international standards to meet local climatic conditions.

Flush Doors

Niki's range of Flush Doors are kiln-seasoned & chemically treated to make them dimensionally stable, termite resistant, fungi free & weather proof. The flush doors have a solid Block Board Core with BWP grade cross bands & face veneers which are PF bonded in Hot Press Process with high temperature making them 100% Boiling Water Proof. They are also available in One Side & Both Side Teak as well as design options.

Door Jams - New Introduction

Niki's Door Jams replaces traditional door frames made out of solid wood. The door jam fits snugly into width of the wall and suitable Architrave covers the sides of the wall and gives an elegant look as well as matches the shutter. The door jams are available with a natural veneer as well as commercial finish. The jams can be painted or polished as per customer's choice. Different designs of Architraves are available to meet the requirements of the customer.

Core options

A Core provides the necessary strength to a door. There are three options available to choose from mainly: Honeycomb, Tubular/solid echo board, and solid Timber Core. Honeycomb & Tubular Echo Board Cores are lightweight, sturdy & reduce the overall weight whereas the Solid Timber Core is a traditional core, much more heavier in nature.
