

8 MP Images
½ sec Trigger Speed
Super Simple Setup

"I just want pictures of deer." You asked, we listened. Not everyone needs a high end full featured camera. The Cuddeback White cameras are the highest performance cameras at this price – ½ second trigger means fewer blanks. Low cost means you can have more of them. 8MP images means you get good images. Easy to use so you spend more time scouting and less time managing your cameras.

Featuring ½ second trigger speed that is the fastest at this price point that captures the deer that so many other cameras would miss.

Then add a Super-Fast Recovery Speed that is ready for the next picture within 1 second of taking the first, and the result is Cuddeback can capture 2 photos before many cameras can capture the first.

Cuddeback's Super Simple Setup makes setup and deployment virtually fool proof. Spend more time scouting and less time messing with the settings.

We even reinvented the mounting system to make it easier and more versatile to deploy the camera. With Genius Mount the user does not bang the camera around while strapping it to a tree, he simply straps (or screws) the mount to the tree then slides the camera on and off as needed. Plus, optional mounts allow panning, tilting, and locking.

Cuddeback IR. With this level of performance and value it's a great camera for budget minded hunters or those who want lots of cameras.

Cuddeback IR Model 1309

8MP Images
½ second trigger speed
24 LEDS for 50 foot range

Feature	Setting	Advantage
Flash Technology	Infrared with 850nm LEDs	IR provides best image quality with only a slight red glow.
Flash Power	24 High Power IR LEDs 50 feet	Not all LEDs are created equally. Camera uses high power LEDs instead of cheaper low power commodity LEDs. Flash range is highly dependent upon the setting, but in a forest deer can be identified to over 50 feet.
Trigger Speed	½ second	Fast trigger speeds allows the camera to capture moving animals before they move beyond the view of the camera.
Recovery Speed	1 to 2 seconds	The camera can be ready for the 2 nd shot 1 to 2 seconds after the first allowing the camera to capture a second animal following the first.
Battery System	AA battery, quantity 8	AA batteries allows the camera to be very small.
Battery Life	Up to 6 months Over 10,000 images	Battery life is dependent on battery quality, run days, number of images taken, temperature, and other factors.
Day Images	Full Color	8MP color image.
Night Images	IR Black and White	8MP properly exposed b/w images.
Image Imprint	Date, Time, Moon Phase, CAM ID	Black bar provides clear identification.
Zone Control	Yes (Select wide/narrow)	Set the animal detector to wide view or narrow view as required by the situation.
Time Lapse	12 seconds to 24 hours	Allows different settings for day and night.
Camera Delays	1 second to 3 minutes	Provide versatility for trails, scrapes, food plots and feeders.
No Card Mode	Yes	Camera will continue to record images without an SD card.
Super Simple setup	Yes	Programing and setup is easy and intuitive.
Video	Yes – 10, 20, 30 seconds	Plus, you can still get an image when you take video
Full Size Images	Yes (4:3)	Full sized images
Genius Mount	Yes	Easier to deploy a camera when the mount is separated from the camera. Optional pan, tilt, lock sold separately.
Warranty Tracker	Yes	No receipt required to validate warranty.
5:1 Warranty	Yes	1 year standard warranty. 5 year reduced cost replacement program.
