

CELESTRON OPTICS

SKY MASTER SERIES

Lower magnification allows the user to locate a subject more easily and then zoom in for a close-up view
Multi-coated optics enhances sharpness of detail and crispness of color

High quality BaK-4 prisms provide higher light transmission for better viewing in low light conditions

Large objective diameter provides a comfortable viewing aperture at high magnification levels

Long eye relief for more comfortable for all users; essential for those wearing eyeglasses while viewing

Diopter adjustment allows for refinement of image to correct for any differences in strength between the users own eyes

Tripod adapter included to mount the binocular on a tripod for prolonged viewing sessions or simply for increased stability while observing

Limited Lifetime Warranty

COMETRON SERIES

Wide field of view reveals a larger portion of the night sky, allowing you to view more of the comet's impressive tail.

Large 50 mm objective lenses have tremendous light-gathering ability, ideal for astronomical use. Multi-coated optics dramatically increase light transmission for brighter images with increased contrast and resolution. Large exit pupil provides maximum light during night time and low-light viewing sessions. Strong and durable aluminium housing.

If you are looking for a very inexpensive entry to the joy of binocular sky watching, you can't do better than

Get ready for the next awe-inspiring comet with a pair of sleek, portable Celestron Cometron 7x50 binoculars. The large 50 mm objective lenses and multi-coated optics offer amazing light-gathering capabilities that bring celestial objects into bright, sharp focus, making them ideal for comet watching, stargazing, and viewing craters on the Moon. Cometron 7x50's wide field of view lets you explore expansive swaths of the sky to quickly pinpoint exactly the object you want to see, then keeps it in your sights without constant movement.

Cometron 7x50's rubberized aluminum housing is durable, lightweight, and tripod adaptable for extended comfort during long stargazing sessions. The binoculars come with a wide neck strap and a carrying case for security, portability, and grab-and-go convenience.

UPCLOSE SERIES

High quality binoculars at an affordable / economical price

OUTLAND SERIES

Multi-Coated Optics

Waterproof and Fog proof

Protective Rubber Covering, Twist-up Eyecups for Quick Adjustment

Moisture Resistant Neoprene Carrying Case, Limited Lifetime Warranty

See the outdoors in a whole new way!(AVAILABLE IN 8X42,10X42)

Celestron's mid-size Outland Series was designed to meet the needs of every outdoor enthusiast, from birders and hunters to sports fans to travelers. The optics are multi-coated to obtain high resolution and high contrast views. The prism are made of BaK-4 glass to give you enhanced color fidelity.

The rubber covered Outland X allows for rough and tough handling and the binoculars are waterproof and fog proof and are nitrogen purged for using in all weather environments. Large focus knobs make for easy and precise focusing and twist-up eyecups allow for quick adjustment of eye relief to obtain the full field of view.

Comfortable straps are pre-attached to the binoculars to make them ready to use. The objective lens covers are semi-attached so they don't get lost on the 42 mm sizes. Tripod adapter threads are included on the 42 mm sizes. All of the above items come in a lightweight, ergonomic design for maximum comfort.

The Outland X is available in four sizes and includes a wide binocular strap, soft protective carry pouch and a No-Fault Lifetime Warranty. The Outland X is a versatile binocular and a superb value, making it the ideal choice for all of your outdoor adventures!

GAMEKEEPER SERIES

ROOF PRISM BINOCULAR

High magnification with a generous field of view allows user to quickly acquire the subject being viewed. Officially licensed Mossy Oak Bottomland® camouflage pattern, BaK-4 prisms increase contrast and resolution for sharper more detailed images. Multi-coated optics for vivid, bright images. Durable, lightweight, waterproof, and nitrogen filled for use in all weather conditions. Twist-up eyecups twist up and down for correct positioning of the users eyes for comfortable viewing with or without eyeglasses.

Mossy Oak Gamekeepers represent a culture who share the same underlying belief that being outdoors is just as much about hunting as it is loving the land, its wildlife, and giving back more than you take.

Multi-coated optics and BaK-4 prisms dramatically increase light transmission, contrast and resolution for sharper more detailed images. The durable yet lightweight design is ideal for use on any purpose when weight and durability are issues. Fully waterproof housing for dependability in all weather conditions and peace of mind when unexpected weather rolls in.

The housing is also filled with dry nitrogen gas to prevent the internal lenses from fogging when moving between extreme temperatures or when using the binocular in damp conditions. 12x magnification and large 50 mm objective lens allows even distant subjects to be observed clearly in detail, even in the low light of early morning or late evening.

A generous field of view allows the subject to be brought into view quickly. The large viewing area allows the subject to move within the field of view without constant movement of the binocular. Especially useful for subjects that move often or quickly (game birds, deer, etc.). The twist up eyecups allows the user to position their eyes at the perfect distance to obtain a full field of view. Comfortable viewing for both eyeglass and non-eyeglass wearers.

OCEANA 7X50 PORRO WP IF AND RC - MILITARY / CAMOUFLAGE

7x50

Individual Focus

Fully Multi-Coated for maximum resolution and high contrast views. **Waterproof and Fog proof** with nitrogen purging for all weather protection. **Rubber covered** for protection and a firm grip

Illuminated Compass built-in for direction location. **Reticle** built-in for determining distance and size of objects. **Calculator Dial** for quick distance measurement, **Aluminum Body Olive Drab** for Military / Camouflage color scheme, **Tripod adapter** fitting for tripod mounting for increased stability **Soft Carrying Case** for protecting the binoculars

- **Limited Lifetime Warranty**

- **The Oceana 7x50 binocular** from Celestron is a waterproof binocular designed for marine and land based observations.

This feature-packed model includes an illuminated compass for direction finding, reticle for distance measurement. Maximum optical performance is appreciated with the BaK-4 prisms and fully multi-coated optics for ultra sharp images with high contrast and resolution. It has a large 50 mm objective lens to offer maximum image brightness even in low light conditions, like dusk and dawn.

LANDSCOUT 60 MM SPOTTING SCOPE

Fully Coated Optics: Increased light transmission for bright, sharp images

Compact, Lightweight: Portable and packable, so you can take it on any excursion out in the field or on the range

Rotating tripod mount: Place the orientation of the eyepiece in the best viewing position for application

12-36x Zoom Eyepiece: Adjustable magnification - wide field of view for general viewing or detailed up-close viewing when needed. Rubber grip for easy magnification adjustment.

Large focus wheel with rubber grip: Easily focus on the subject, even when wearing gloves

The LandScout 60 mm Spotting Scope is easy-to-use and perfect for any outdoor activity. The compact, lightweight design is ideal for carrying with you on a backpacking trip or hiking excursion. Land Scout is also the perfect spotting scope to bring with you to an indoor or outdoor shooting range. You'll be able to quickly set up this spotting scope and use the 12-36x zoom to get in close to the action. Although it's an affordable, entry-level spotting scope, the LandScout features multi-coated optics and provides bright, sharp views. Also makes a great backup scope when you don't want to carry a larger, heavier scope.

The 60 mm Waterproof UpClose Spotting Scope is a good choice for bird watching, nature or wildlife observation, hunting and enjoying scenic views.

This scope is extremely lightweight (under two pounds) and comes with both a soft case and an aluminum case.

The high quality optics come at an economical price and enjoy a Limited Lifetime Warranty.

LENSPEN OPTICS CLEANING TOOL

Keep your optics clean with the innovative Lens Pen, Use the soft retractable brush for removing loose particles and dust

Clean smudges, fingerprints, pollen, and other sticky substances from the optics with the special cleaning element

No liquids are used...nothing to spill or dry out

The Lens Pen is safe and easy-to-use. Keep one handy for all your optics!

How many times has dust or lint on your eyepiece or telescope ruined an observing session? One innocent-looking strand of hair strewn across the lens in your photos or astro images can take hours of clean-up in a photo-editing program, and a greasy thumbprint or smudge on the optics can send an otherwise perfect image to the trash. Enter the Celestron Lens Pen, a dual function optical cleaning tool that is small and lightweight enough to stay in your telescope accessory case or camera bag so it will always be there when you need it.

The Lens Pen is two cleaning tools in one. One end contains a soft brush for removing dust and other particulates from any optical surface. The opposite end of the LensPen will handle the smudges and spots that cannot be brushed away. This tool has a special cleaning tip that works without the need for liquids, so it will never dry out. A cap protects the smudge removal tool when not in use, while the brush retracts safely inside the Lens Pen.

When cleaning optics, it is always best to use the brush first, even if you think it unnecessary. Carefully brush the entire surface, and when you are done, inspect your work. If you find any smears or spots, use the cleaning element to remove them, using a light touch.

The Celestron Lens Pen is a great tool for all of your optical equipment, including eyepieces, telescopes, spotting scopes, binoculars, microscopes, cameras, lenses, and more.
