

# CRYSTAL GRADE For Glass

## Product Overview

### General Properties

This grade is basically suitable for all types of glass works. Very high adhesion glass surfaces. Excellent shining after transferring, Oil resistance and washing resistance are excellent. No glittering.

### Main applications

Glass decorative items, Cosmetic boxes

### Key Features

Crystal grade adhesive is a very high performance reactive adhesive and high adhesion strength. It makes suitable for all types of Glass works

### Technical information

- |                       |   |
|-----------------------|---|
| Shades availability   | - Crystal grade is available in gold and multi shades   |
| Operating temperature | - 100 to 180 degree Celsius   |
| Resistance property   | - oil resistance<br>washing resistance.<br>UV resistance, Excellent Moisture resistance<br>Alcohol resistance approved,<br>Excellent Moisture resistance  |
| Characteristics       | - High performance Foil<br>No peel-off with Cello tape<br>Excellent scratch proof<br>No Oxidation otherwise no black spots after Foiling  |
| Storage conditions    | - Temperature 18 to 35 degree Celsius<br>and 35 to 70% relative humidity  |
| Toxicity              | - Crystal Grade is classed on Non-toxic meeting<br>Stringent legislation of numerous national<br>and international industry standards including<br>ICP Ms Method<br>EN 1122 by ICP Ms<br>ASTM - D 3421:75 |
