**Our Mission:**
We aim to build a growing and profitable business by consistently living up to the expectations of our customers and delivering on their requirements time & time again. We seek to realize this goal through active communication; by investing in the capabilities of members of our team; and by understanding our customers’ current & future needs. We measure our effectiveness and try to learn from our experience. We always strive to have a positive social and environmental impact in our work.

**Team:**
Our most important asset is the people selected to serve you. We actively encourage every member of staff to acquire higher-level skills and qualifications to maximize the quality of our products and service, to provide utmost customer satisfaction. We do not accept minimum standards. We demand the best. We have unique training style ensuring all new and existing staff is trained to exceptional standards. Training programs combine practical knowledge with achievement of quality and standards. These are all required to guarantee the levels of expertise and service you rightly demand.

**Assured Quality & Services:**
Quality and standards are rigorously monitored and are regularly self-assessed for the products & services we are dealing. The same exacting standards that are demand from our products and services are also imposed on all our suppliers and outside services. The company will only accept the finest products, the most reliable services and the fairest price.

**Chemical Waste Disposal & Management:**
At Freelance Logistics LLC we really do care. Not just about the bigger picture of protecting the planet, but about helping you with the ins and outs of your everyday processes. As experts in our field, having provided hassle-free chemical waste collection, recycling and recovery solutions, we can confidently offer affordable waste management services that are as good for you as they are for the environment. That means fast response times, value for money and excellent customer service are our main priorities. To ensure you get more out of your chemical waste recycling service, and keep more waste out of landfill, we offer:
- Trained Drivers: eco-friendly service when handling chemical or business waste
- Competitive Pricing: we cut costs as well as waste.
