OMSONS : THE VISION OF MEASUREMENT

OMSONS has been manufacturing innovative and high quality measurement equipment for scientific and industrial purposes for the last 27 years.

Our Products and services include laboratory equipment for all oil industries School, Universities and Research purpose. Our inspiring principles are to develop and market innovative high quality products so that we can offer the best available tools for a modern measurement and training system to all our clients and all oil companies.

With a large and established customer database throughout India, **OMSONS** is highly recommended as a premier manufacturer of reliable, high quality and competitively price products.

Started as a family business, **OMSONS** has today become a premier company of Petroleum Density Measuring instruments in India. Nevertheless, family tradition and its value are still at the basis of our work.

The principles underline the company mission have been the foundation of decades of success and we hold these principles as being as imported now as they were in 1983. Thus, We are ready to meet new market demands with the passion and the dedication of the past, together with the tools of tomorrow, convinced that our gratification and our customer satisfaction will be the one and the same.

On overwhelming response of our products, we got ISI mark on our leading products i.e. density hydrometer in 2001 from bureau of Indian standard and the other products are online .

CALIBRATION SERVICES

On overwhelming response from our **OMSONS** products, We registered our product i.e. Density hydrometer under Bureau of Indian Standards (ISI) in 2001. For quality programs like ISI and ISO our products based on that standards and traceability to NPL master pieces.

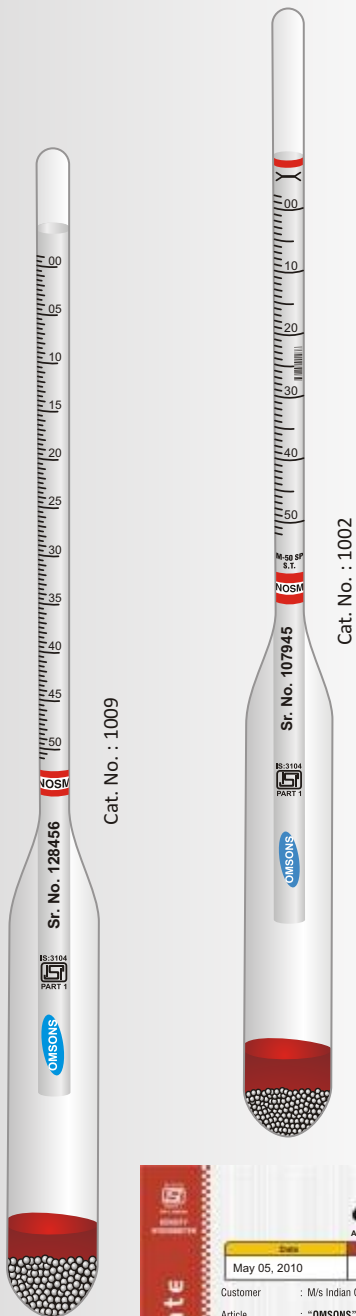

The instruments calibrated in our laboratory on ISI standard along with NPL traceability certificates. We calibrate the instruments and the correction to be applied at *3 or *4 points on the recommended scales at our works certificates. Copy of NPL traceability certificate also provided for reference .

We calibrate the Hydrometer and Thermometer with one step higher instruments for providing more accuracy relating to their least counts .
