ABOUT US

With nearly 9 years of experience in the market, we are one of the leading manufacturers and exporters of superior quality **After market spares for Schwing, Greaves, Putzmeister and Aquarius - Concrete Pump , Batching plant and Transit Mixers and Also supplying to O.E.M's and traders.**

Our range includes **Concrete Pump Spare Parts** : RAM/ Piston Seal, Concrete delivery Pipes , End Rings, and Taper Pipes, Gate Valve, Cup Body ,Pipe Cleaning Ball, Seal Kits

And for **Batching plant spares** : shovel, stripper, Wearing packing, Bottom Tiles, Load cell Wire Rope, Butterfly Valve. Proximity switch etc.

Transit Mixer spares : Reverse forward and Control Cable, Guide Rollers, Pin Bush assembly, Control Levers, Rubber gasket, Thermo sensor etc.

Our manufacturing unit is equipped with all the latest machine and equipment including Lathe, Cutting machine, Polishing, Welding and Drilling machine to meet the requirements. We offer quality products at industry leading prices and thus we have been able to cater a huge client base across the country.

PRODUCT PORTFOLIO

We are a renowned manufacturer and exporter of construction components. We are engaged in manufacturing Spare Parts for concrete pump, Batching Plant and Transit Mixer.

. These products have been made from fine quality steel and alloys procured from reliable vendors to ensure durability and reliability. Understanding various requirements of construction companies, RMC plants and concrete pumping services we offer our products.

Some of the features of our products are:

- Sturdy construction
- Durability
- Crack resistant
- Ease of use
- Excellent performance
- Low maintenance

INDUSTRIES CATERED TO

- Construction equipment Manufacturer
- Ready mix concrete companies
- Concrete pumping Services
- Construction companies

CUSTOMIZATION

We are one of the leading manufacturers and exporters of superior quality concrete machine components. With an aim to offer quality and total customer satisfaction, we customize our range of products without compromising on quality as per client's requirement. We continuously strive to communicate with our valued clients in order to come up with different solutions as per their specific needs and demands. We provide customized production and services to our clients.

Our range is customized on the following parameters:

- Dimension
- Size

OUR INFRASTRUCTURE

We have developed a sound infrastructure equipped with the latest techniques to produce the best quality products and meet the specific requirements of the clients. All the departments work in close coordination to ensure smooth functioning of the organization.

Our infrastructure consists of :

- Manufacturing unit
- Quality Testing
- Warehouse & Packaging

Our manufacturing unit sprawling in an area of 109 yards and is equipped with all the machine and equipment required. We use superior quality Mild steel, cast steel, Ni – hard, stainless steel, manganese steel and other ferrous alloys in our production process.

QUALITY ASSURANCE

Quality of the products is an essential part of our company and we focus totally on quality at reasonable price. Our products are procured from reliable vendors and are tested by our experienced quality controllers on various parameters to ensure standard quality is produced and delivered to our clients. Our proprietor keep a close eye on the manufacturing process right from the purchase of raw material to the delivery of quality products just to ensure total customer satisfaction.

The various quality tests conducted are :

- Physical Tests like
- Hardness (for Wearing Parts)
- Elongation
- Burst Strength(for pipes)
- Chemical Tests for most of parts

CUSTOMER SATISFACTION

Client satisfaction is on top of our priority list and all our activities are directed towards achieving the same. We offer the best quality products at most competitive prices. Our proficiency in offering superior quality components including taper pipes, pipe end rings and other concrete pump spare parts to our customers has earned us large client base

We believe in Excellence through Service and strive to achieve complete customer satisfaction by timely delivering high grade components to our clients.
