Product identification

Part number :
19006000 – MASK LCD HORUS 9-13

Reference standards

89/686/EEC
EN-379 (LCD filter)
EN-175 (Helmet)

Description & Applications

The automatic LCD welding mask HORUS is a very reliable device for labour protection specially designed for MIG and MMA welding applications.

It can efficiently protect operator's eyes and face from injuries caused by the arc during welding operations.

The Auto-darkening filter protects the user against harmful UV/IR rays, both in the dark and light state.

Thanks to its excellent quality and its intuitive adjustments, it is ideal for all the infrequent welders that want to have a highly-affordable device.

General applications:

GMAW (MIG/MAG) – SMAW (MMA)

Filter Specifications:

Optical Class: 1/1/1/2	Sensitivity Control: 3 steps Internal Adjustment
View Area: 90x40mm (3600 mm ²)	Delay Control: 0.1 – 0.5 – 0.9 sec 3 steps Internal Adjustment
Type of LCD filter: Analog	Grinding mode: YES
Filter Size: 110x90x9mm	Power supply: Solar Cells + Lithium battery not replaceable
ARC Sensing: 2 sensors	Operating Temperature: -10 / +65 °C (14 / +149 °F)
Switching Time: 0,1 ms	UV / IR Protection: up to Shade 15 (permanent)
Light Shade: #4	Auto power off YES
Dark Shade: #9-13 External Adjustment
