Industrial RO Plant

Reverse Osmosis is a technology that is used to remove a large majority of contaminants from water by pushing the water under pressure through a semi-permeable membrane. **PURIFY HYDRO** offers a complete range of industrial and commercial water purification equipments, and purifiers by deploying advanced RO technology which meets the challenging industrial requirements.

STP Plant

PURIFY HYDRO: supplier of Compact Sewage and Effluent Water Treatment Plants (CETP). These plants are sustainable & environment friendly.

Our plants are valued by esteemed clients for their compact design, user friendly, durability, low maintenance, corrosion resistance and longer service life features. In order to meet the varied requirements of clients, we provide our plants in both, standard and customized forms.

Industrial STP/ETP for the following industries:

Hotels, Hospitals, Schools, Universities, Textile, Paper, Dying, Automobile, and Pharmaceuticals.

PURIFY HYDRO: is a well known water treatment company, based in Noida. Our Company is recognized as a leading supplier of Sewage Treatment Plant (STP), Effluent Treatment Plant (ETP) and Waste Water Treatment Plant (WTP) according to PollutionControl board guidelines and undertakes such projects on turnkey basis on a PAN India Level.

Our well trained professionals assure that these products are in accordance with the international standards of quality.

We are manufacturers of Plants of following capacities.

1. STP plants capacities from 5 KLD to 1000 KLD
2. Combined STP and ETP (CETP)

Salient Features of Compact STP Plant

- Reduction of Biological Oxygen Demand (BOD)
- Reduction Carbon Oxygen Demand (COD)
- Maintaining PH
- On site assistance by qualified engineers
- Minimum or Zero discharge
- Colorless & odor less treated water
- Highly suitable for inconsistent sewage
- Recycling of waste water

Technologies Offered in Compact STP Plant

- MBBR (Mix Bed Bio Reactor)
- SAFF(Sub merged Aerated fixed film)
- SBR (Sequencing Bio Reactor)

ETP Plant

PURIFY HYDRO: supplier of Compact Effluent Water Treatment Plants. These Plants are valued by our esteemed clients for their compact design, user friendly, durability, low maintenance, corrosion resistance and longer life. In order to meet the varied requirements of clients, these products are provided in both, standard and customized forms.

ETP for the following industries:

Food, Beverages, Metals, Mining, Textile, Paper, Sugar, Dying, Hotels, Automobile, and Pharmaceuticals

PURIFY HYDRO : is a well known water treatment company, based in Noida. Our Company is recognized as a leading supplier of Effluent Treatment Plant (ETP) and Waste Water Treatment Plants conforming to Pollution Control board guidelines. And undertakes projects on turnkey basis on a PAN India level.

We are manufacturers of Plants of following capacities.

ETP plants capacities from 2 KLD to 1000 KLD

Salient Features of Compact ETP Plant

- Reduction of Biological Oxygen Demand (BOD)
- Reduction Carbon Oxygen Demand (COD)
- Maintaining PH
- On site assistance by qualified engineers
- VIVimum 2 ero discharge
- Colorless & odor less treated water

Swimming Pool System

Swimming Pools is a distinct product range offered by this prestigious name, PURIFY HYDRO. It offers an outstanding range of Water Treatment Solutions uniquely designed for its contemporary clients. The decisive range of Swimming Pools in India is made from a superior quality of raw material followed by advance technological strategy offering a selective product range in the market. These are impeccably designed by a host of professionals in order to meet the present industry requirements with outmost efficiency via its selective product range and services.
