NEETA BELLOWS

Bellows & Covers

Reduce maintainance increase machine life

Mfg. Of all types of Bellows & Covers

- Leather
- Rexine
- Nylon + Polyster
- Rubber & pvc coated fabric
- Canvas
- Rubber
- Teflon
- High Temp.Glass/Ceramic Fabric upto 1200 'C

BELLOWS & COVERS USED

- To Protect Precision Parts of Machines
- Give Aesthaetic / Beautiful look to Machines
- Lower the maintenance cost & Increase the productivity and life of the Machines

C Type Bellows are designed to protect the precession Guideways of M/C. From coolant, Dust, and Metal Chips. These bellows are used for covering guideways of CNC machines /Cylindrical Grinding Machines, Milling Machines and all types of SPMs

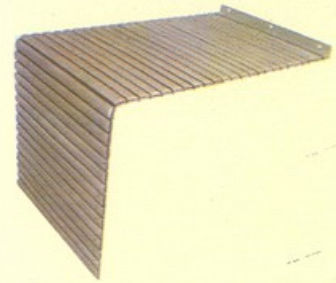

Round/ Square, Hexagonal, Octagonal bellows as normally used to cover the Piston Rod, shafts, Ball Screws from dust, Coolant and Metal Chips etc.

Squar type Bellows are normally designed for Ducting, Inlet & Outlet, exhaust of blowers. This can be made as per customers requirments.

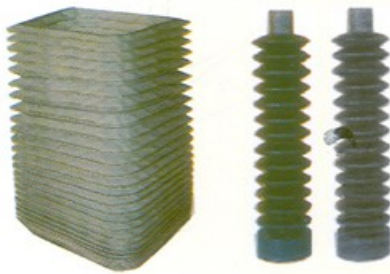

Metal clad (Metal covered) Bellows are normally used where there is no space for compression of Bellows & where continuous Machining process is going on.

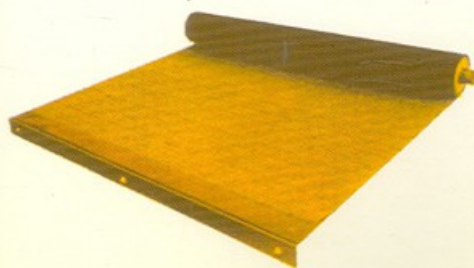

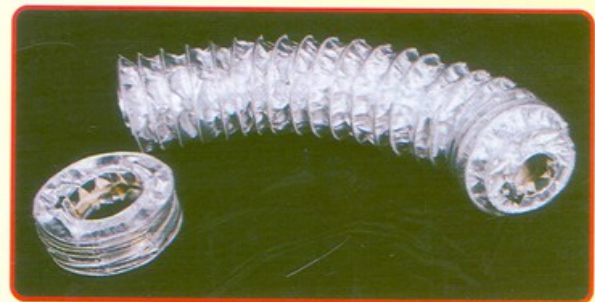

PTFE /Teflon bellows are used where chemicals & chemical fumes are continuous in contact with the instrument. These are normally used in chemical industry, labs & instrumentation engineering.

Rubber Expansion joint are used where requires flexibility in pipe joints & to having high pressure upto 10 kg/cm^2 and vaccume area.

Rubber Bellows and Rubber coated fabric bellows are used where continues flow of water coolant and continues movement of the machine is required.

High Temp. Glass/Ceramic Fabric bellows are used where there is continues high temp. Application i.e. Near furnaces. This materials withstand temp upto 1200°C to 1400°C & totally fireproof.

Roller covers are normally used where there is no space for compression & expansion length is more for Machine, This is available in P.U. Coated fabric to give better tear & abrasions resistance.

Neeta Bellows is a leading manufacturer of all types of bellows & covers used in all types of Industries. Bellows & Covers are used in machine to prevent dust particles, metallic chips, foreign particles to enter into the precision or important part of the machine to avoid damages to it and give longer life to the machine part to avoid brake down of machine. It also gives better look to the machine & covers the damage or unseen part of the machine. It also covers the safety of the user.

MATERIALS OF BELLOWS

- * Leather Bellows
- * Foam Bellows
- * Rexene Bellows
- * PVC/ plastic coated Bellows
- * Fabric Bellows
- * Silicon coated fabric Bellows
- * Nylon polyester Bellows
- * Rubber coated fabric Bellows
- * Canvas Bellows
- * High Temp. Fabric Bellows upto 1200^oc
- * Rubber Bellows/Expansion joints
- * Teflon Bellows

SHAPES

- * Circular
- * Rectangular
- * Square
- * Hexagonal
- * Octagonal
- * 'C' type
- * CameratypBellows
- * Roller Guard

USES

- * Liquid
- * Oil
- * Coolant
- * Water
- * Dust
- * Hot air
- * Granules
- * Metallic chips
- * Powder
- * Smoke etc
- * Chemicals

Bellows are having various applications in all types industries such as

- * Engineering/Mechanical Industries.
- * Hydraulics /Pneumatic industries.
- * Food Industries.
- * Plastic Industries.
- * Cement & Tiles Industries.
- * Electrical and Electronics Industries.
- * Chemical Industries.
- * Computerized / Scientific Instruments.
- * Marble polishing Machine manufacturing Industries.
- * Coal & Paint Industries.
- * Grinding Machines manufacturing Industries.

Bellows are used in various Machines such as

- * All type of grinding Machines Vertical/HORIZONTAL, Jig Boaring Machines, Milling Machines.
- * All type of CNC Machines
- * Hydraulics presses.
- * Hydraulics/ Pneumatic cylinders,
- * All types of Testing Machines etc.

We welcome your enquires or call in this regards with all respect in the mean time we assure you our best services at all time. We look forward to hear from you,

108, K. K. Gupta Ind. Estate, Dr. Rajendra Prasad Road, Mulund (West), Mumbai-400 080.
