Taking Customer satisfaction to the Next Level

About Us :

We, Smiko Equipments Pvt. Ltd. established in the year 2003, are one of the illustrious firms engaged in manufacturing, supplying and exporting a wide range of Coil Processing Lines, Metal Rolling Mill Equipments, material handling equipments, hydraulic machines and hydraulic cylinders. Our products quality testing based on various parameters in order to ensure that these are free from any sort of defects. Due to optimum quality, efficient performance, cost efficiency and longer life, our products are highly appreciated in the market. We adopt new technology in our manufacturing unit for design and product modification. Persisting in the value that "employees and customers" are the "pillars" of one company. Smiko will continue to treat employees with integrity and care; help customers create value with excellent products and services.

Infrastructure :

The production unit of the company is located at Dewas by the side of national Highway. It spreads across an area of over 35000 sq.ft. and equipped with a modern machine shop consisting of machines, inspection area and assembly shop with heavy duty crane, precise measuring devices, enclosed space and ideal infrastructure for Trial Run of Coil Processing Lines. The factory also includes administrative and works office for the management and staff with high speed Internet connectivity. Excellent transport facilities, abundant raw material sources and ready availability of low cost skilled manpower are some of the geographical advantages enjoyed by the company. The production facility has an in-house Design Center with latest software.
