# FIBROD™

## Duct Rodder

**FIBROD** is fibre glass rod covered with high density engineered plastic. Having high tensile strength. **FIBROD** can cater to large types of cable installations.

### Standard Accessories

# FIBROD™

## Duct Rodder

### Features

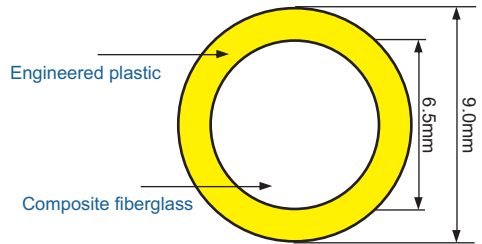

High Tensile strength and flexibility

Anti UV capability

Customised lengths available

#### Packing Information

Dimensions after packing:  
**100cm(l) x 40cm(w) x 112cm(h)**

### Specifications

Light weight, durable, resistance to acid, alkali, aging resistance & corrosion resistance

Good temperature adaptability. Its usability will not be affected by temperature

Outer layer are made of high density polyethylene engineering plastic.

#### Length of rod:

100m | 125m | 150m | 175m | 200m |  
225m | 250m | 275m | 300m
