

CUSTOMER : M/s TATA YAZAKI AUTOCOMP LTD.

PROBLEM REPORTED : For purpose of energy saving, company had Installed polypropylene clear sheets by replacing Some galvalum sheets from roof. These sheets Were passing light as well as heat to the shop Floor thereby increasing shop floor heat and lux Level.

PROPOSED SOLUTION : Application of UGAM P U with THERMAL INSULATION was proposed with lux reducing Compound.

ACTION TAKEN : Entire Clear sheets were coated with proposed System.

RESULTS ACHIEVED : Lux level was reduced to required level. Temperature was reduced by 4 degrees C. These coatings are being used by almost entire Tata Group e.g. TATA TOYO RADIATORS LTD., TATA JOHNSON LTD. Etc.
