

# PARAS – pH BOOSTER

Boiler Feed  
Water Treatment  
Chemical

---

**PRODUCT AND APPLICATION** : PARAS – pH Booster is Alkali based Polyacrylate formulate with Corrosion inhibitor. It is most suitable to improve the pH of Boiler Feed Water to desired level of 8 – 9.5 without any sedimentation/ deposition in Tubes / Valves unlike plain Caustic Treatment. The product helps build up pH in Boiler Drum / Tubes to desired level of 10.5 to 12.5

---

**PRODUCT DATA** :

Appearance	:	Colourless to Pale Yellow Liquid.
Sp gr. at 25 °C	:	1.150 to 1.185
pH	:	13 – 14 (when ionised)

---

**FEATURE** :

- \* Ready to use liquid.
- \* Economical
- \* Easy to handle and feed. Controls pH – Alkalinity in Boiler Drum / Tube without any deposition or Corrosion.

---

**DOSAGE** : The Dosage varies with pH of Feed Water. Based on pH 7 of Feed Water, a dose of 35 ppm should suffice. The exact dose quantity will have to be fixed by titration and close monitoring.

---

**FEEDING** : Any convenient feed equipment can be used. On line continuous feed in proportion to feed water flow is preferred

---

**PACKING** : 35 Kgs. HDPE Carboys.

---

**STORAGE AND HANDLING** : Store Carbuoys in shed. Keep the container closed when not in use. Flush out floor spillage with plenty of water. Flush with clean normal water in case of contact with skin. In case of eye contact flush with clean water and get medical attention. Wear safety equipments like Hand Gloves, Goggles, Face shield while handling the Chemical.

## PARAS HYDROCHEM

Manufacturers of Complete Range of Chemicals for Treatment of  
Boiler Feed water, Cooling water, Resin Defouling and Descaling.
