Our products are inspired by innovation....

Our solutions are customized.....”

Architectural Stainless Steel range of products for Frameless Glass Systems

Soft Closing Hydraulic Hinges for Glass, Timber and Metal doors

Energy Efficient Glaze Units

Custom-made Architectural Stainless Steel Profiles

“Our brand is Global, yet our solutions are local...”

We add Elegance, Safety and Comfort to your buildings...

We Innovate the Future”

COMPANY PROFILE

Primero Industries India is a part of a group of companies with headquarters in Australia. The company engages in the design, development, manufacture and supply of superior quality and high performance architectural products and solutions for both interior and exterior applications.

Primero offers a wide range of framed and frameless architectural glass systems that are functionally superior and aesthetically appealing. You can find below, a versatile range of our product portfolio; which we hope that you will find them useful in your current and upcoming projects. The avant-garde product solutions offered by Primero are fruits born of precision engineering, raw materials of superior quality and dedicated quality control at all stages of our in-house design and development.

Primero Industries is united by our overall mission, which is to strive to develop and supply products to the market; that are unparalleled in design, quality and performance. In particular, Primero Industries India is established to market and service the following product range in the South Asian markets.

Vision

To emerge as a world leader in innovating future oriented and custom-made architectural hardware for building systems

Mission

To become a leading developer, manufacturer and supplier of unparalleled building systems that are inspired by contemporary architecture and driven by future oriented technologies

Quality Assurance

The company closely monitors and controls the quality of all raw materials and manufacturing processes to ensure that customers are offered with products of superior quality, high performance and appealing design. The product durability, functionality and reliability are further guaranteed by our in-house quality tests that are constantly performed during various stages of our production and supply chain management.

Stainox® range of products are designed, engineered and manufactured to stringent Quality Control procedures and International Standards. Our products are marketed worldwide through our Associate companies in America, Europe, South Asia, Middle-East, SE Asia and Oceanic Region. All the hardware and accessory fittings in Stainox range are made out of high grade Stainless Steel which are custom designed to suit the individual requirements of every customer.

Our focus in serving the market needs enhances our sensitivity to develop comprehensive systems giving us the edge to compete with the best in world market. The Stainox range of products are designed, engineered and manufactured to stringent Quality Control procedures and International Standards.

All the hardware and accessory fittings in Stainox range are made out of high grade Stainless Steel (304 or 316 grade), which are custom designed to suit the individual requirements of every customer. Stainox covers a wide range of product solutions for building industry that includes:

- **Entrance and Façade Systems**
{ Typical installation includes Glass fin system / Point fixed system / Tension rod system / Cable net (or) Cable truss system }

Framed or Frameless Cantilevered Canopy systems

Railing and Baluster System

Framed or Frameless Handrails and Baluster system

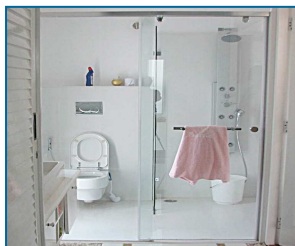

Pool Fence System

Pool fence, gates and access doors using Holed or Friction spigots

Glass Hardware & Partitions

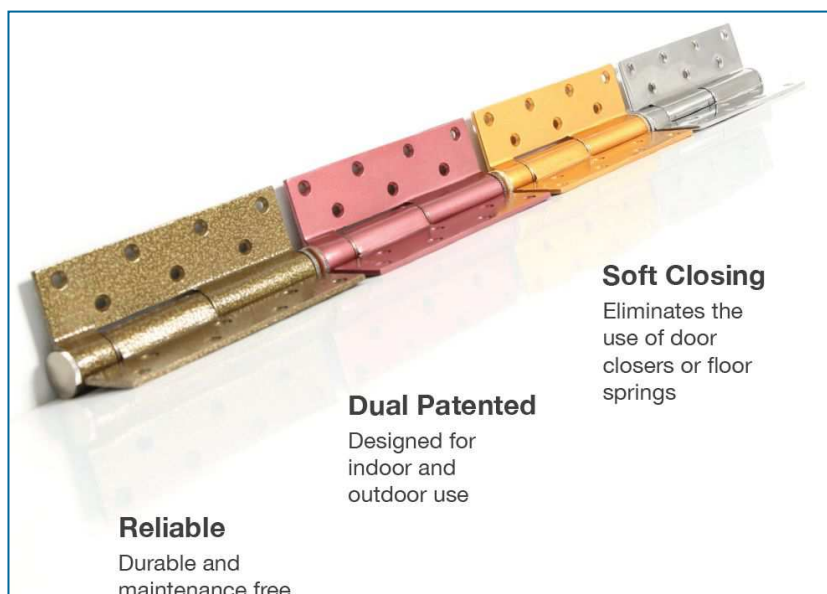

Patch fittings, Hardware and Sliding door system

Shower Cubicle System

Shower cubicles for Swing and Sliding door system

The Softerclos™ Hinges are first of its kind in the South Asian market to provide soft closing of doors without the requirement of door closers or floor springs. These Hinges are designed as an alternate to eliminate the use of exposed door closing system. They can be easily retrofitted on any existing doors. Softerclos hinges, with its alluring product design and unparalleled product features, opens a new horizon in the field of architectural building hardware. Softerclos Hinges are available separately for Timber/Metal doors and Glass door applications.

Softerclos Hinge for Timber and Metal Doors

Softerclos Hinge for Glass Doors

Product Features

- Soft closing
- Patented design
- Adjustable Closing Speed
- Adjustable Latching Function
- Adjustable Hold Open (optional)
- Suitable for Interior and Exterior use
- Can be used for door weights between 30–100Kgs
- Easy installation, adjustment and maintenance
- Can be effortlessly retrofitted in existing doors
- Available in Satin/Polish SS and RAL colours (for Timber and Metal doors)
- Available in Satin/Polish SS finish (SS 316 or SS 316L base material) for Glass application
- Reliable and durable
- Corrosion resistant
- Cost effective

Energy Efficient Glazed Units

EEGU™ the acronym for ENERGY EFFICIENT GLAZED UNITS, is trademarked for its uniqueness, ingenuity and outstanding quality over similar products. EEGU is an integration of a venetian blind within a double glazed unit, which offers both privacy and energy efficiency. This innovation unveils advantages beyond just energy saving and can be used as partitions that offer high level of privacy in both residential and commercial applications.

EEGU is available in manually operated, electrically operated and remotely operated versions. Optionally, EEGU can be connected to any Internal or External light sensors for automatic / timed operation.

Application Areas

- Room Dividers
- Office Partitions and Doors
- Conference Room Partitions and Doors
- Hospital ICU Doors and Partitions
- Domestic Residential Doors
- Windows (fixed/openable)
- Audio/Media Rooms
- Sun Rooms

Product Features and Advantages

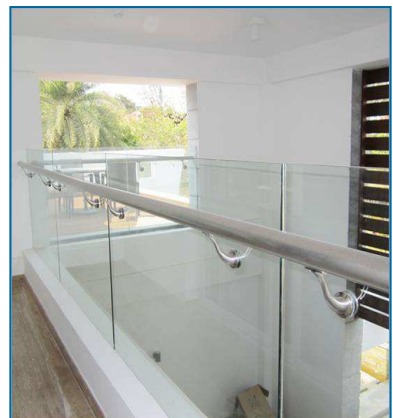

- Absolute privacy
- Aesthetically appealing
- Reduce direct sunrays and glare
- Protection of blinds from dust and damage
- Energy efficient (with Low E glass)
- Easy installation and maintenance
- Available in various RAL colours
- Acoustic noise reduction

The Finpro architectural stainless steel profiles from Primero is a perfect harmony of durability combined with alluring aesthetics. The Finpro system is completely tailor made to add elegance, comfort and safety aspects of a building and proves to be a perfect solution for stairways, balconies, patio, portico, walk-ways and garden areas.

Product Features and Advantages

- Customised architectural SS profiles and pipes for handrail applications
- Available with complete range of fixing clamps, spigots and accessories
- Suitable for both interior and exterior handrails
- Customised “weld-free” solution available
- Available in SS base with Satin/Polish finish
- Available in MS base with RAL powder coated finish
- Unlimited design possibilities to match the building design
- Suitable for both new construction as well as refurbishment buildings
