WASHER EXTRACTOR

Feather touch, programmable computer control system which is fully automatic, safe, stable and shock proof. The latest world class suspension structure is adopted to reduce shock replace the original shock design by liquid pressure buffer with springs. This will ensure an ideal shockproof effect even on higher floors. The drum without compartment and a single door make loading and unloading easier reduces labour work load.

Capacity : 15, 30 & 60 Kgs

WASHING MACHINE (VERTICAL / FRONT LOADING)

Epoxy coated hot dipped galvanized iron bottom frame with stainless steel body. Sampling port with toughened glass provided on the main door. High load capacity with manual and automatic mode for selecting the program. Equipped with fully automatic control panel. Reduction pulley and V- belt drive mechanism.

Capacity
15,30 kgs

15, 30, 60 Kgs

WASHING MACHINE (HORIZONTAL / TOP LOADING)

Stainless steel for control panel, outer drum end plates, inner basket and safety guards. Smooth and soft drive ensured by gear box with pulley. Easy to operate with fully automatic panel. Better loading ratio as the door height is above the center of the drum. Hot forged end flange shafts with long life water level can be controlled by calibrated level indicator. Quick release of water by cast iron drainage ensures minimum maintenance.

Capacity
15,30, 60 & 100 kgs

Capacity
15,30, 60 & 120 kgs

HYDRO EXTRACTOR (DIRECT DRIVE)

Both inner and outer drums are of stainless steel. Inner Basket is mounted on the motor. Door locks provided Continuous current braking system to ensure simple and safe operation. Suspended motor with thermal and anti humidity insulation.

Capacity
7.5,10 kgs

Capacity
15 & 30 Kgs

HYDRO EXTRACTOR 3 PIN (SUSPENDED)

- Smooth and vibration free extract.
- Close grained cast iron body with pedigree hydraulic transmission clutch.
- Electrical, safety limit and control switch on the loading door.

Capacity
30, 50 & 100 Kgs

TUMBLE DRYER

Epoxy coated hot dipped galvanized iron bottom frame with Inner stainless steel basket. Logic programmer with auto controls. Close grain cast iron pulley drive with V belts. High load capacity ratings and faster drying time. CMC designed stainless steel paddle fitted to inner stainless steel basket ensures smooth tumbling effect.

Capacity
15, 30, 60 & 120 Kgs

DRY CLEANING MACHINE (PERC)

It is fully automatic, all bottom tanks are made of stainless steel. There are three solvent storage tanks and one distillation tank. Out of three one is for clean, one is for dirty, one is for working solvent to avoid solvent mixing. It has high quality cool recycle working system, can save about 99% solvent. Since it is working with in a closed environment, no pollution to the air and keep the room fresh. Fluff collector uses nylon bag on the filter to prevent blockage. High-speed fan can speed up the drying and cooling rate. The machine comes with in-built chiller. Consumption of perc. will be very less in the dry cleaning cycle.

Capacity
8, 10, 15 kgs

ELECTRICAL STEAM BOILERS

These machines are equipped with several safety features like water level controller, pressure controller, Temperature controller, Pressure releasing valve and visual indicators Fitted with Stainless Steel immersion heaters that can be easily replaced. These are very compact and easy to install and maintain.

Capacity :
1 table

Capacity :
2 & 4 tables

OIL FIRED BOILERS

These machines are equipped with several safety features like water level controller, pressure controller, Temperature controller, Pressure releasing valve, Safety Alarms, Safety Lockout features and visual indicators. The inner shell is constructed with strong seamless Pipes and fully tested for maximum Pressure holding capacity to ensure operator safety Fitted with Imported Eco flame Burners and control system.

Capacity :
50 & 100 Kgs

VACUUM FINISHING TABLE

Table top padded with imported silicon foam and heat proof cloth. Provided exhaust duct with powerful suction through centrifugal blower activated by full length foot pedal. Provided imported steam / electrical iron with silicon pads, teflon shoes and arial spring.

SPOTTING TABLE

This is used to remove stains in combination of steam, air and suitable stain removers. It has one air/steam heat proof gun, two cold spotting guns, two SS bucks with air suction system. In other models inbuilt compressor is provided to the above.

FLAT WORK IRONER (ELECTRICAL / STEAM)

These Machines are compact and occupy small area. It is one of the most efficient machines with lowest power consumption. The Ironing Chest is nickel plated to protect from rusting. The moving chest is self aligning. Equipped with adjustable automatic/manual timer controller, padded roller, Piston supported chest, Powerful suction to remove excess moisture.

It is a high speed, energy saving, compact size, well built, user friendly machine with safety and reliability. Both temperature and the speed can be controlled automatically according to the different materials to be ironed.

SAREE ROLLING MACHINE

we are able to offer a superior range of sari rolling machines are preferably appropriate for ironing/ polishing different types of saris. These machines are supported with profound duty springs for self aligning while ironing thus eliminating the chances of damage.

Features of this range are mentioned below:

- Durability
- High tolerance
- Easy operation

FLAT BED PRESS

Flat Bed Press Suitable for Table Covers, Pillow Covers, Napkins, Kitchen Linen and staff uniform. The suction feature, quality padding and teflon lining on heat guarantee fine finishing

A Word About us

Megha Laundry Equipments (P) Ltd., Is the sister concern of Sri Meghna Enterprises.

Sri Meghna Enterprises established in the year 2004, which is the leading supplier of Laundry Chemicals & detergents. Apart from our laundry chemicals, we are also dealing with wide range of Guest Amenities & House keeping chemicals with our own Brand 

Taking a further step, we have established **MEGHA Laundry Equipments (P) Ltd.** Megha Shares a commitment with our esteemed customers. A commitment based on trust generated through years of customer satisfaction. Our vision is to be one of the trust worthy and quality equipment manufacturer by providing high quality Machines to Laundry and Garment Industry.

 started by a group of qualified engineers well exposed to the needs of Industry, serves 24X7 to fulfill the requirements of the clients. Years of experience in this field help us to offer right kind of equipment to the clients. Megha provides High Quality, effective & affordable machineries, at a reasonable cost to the clients.

About our M.D's. Profile ...

The company's history goes back 20 years... **Mr.SHANKAR.G** founder of the present management and a man who was convinced that the future lay in mechanised equipment with combination of electro-mechanical and plc's and thus MEGHA was founded with similar workshop step. Having started out in 1995 with a dedicated 20 years experience of laundry sector. Mr. Shankar Chairman of MEGHA Group of companies, promoted the equipment through hard work, commitment, honest and provide best after sales services in comparison to any other manufactures in the field, as and when required to its clients.

Infrastructure

The company has its own plant and machinery setup at jeedimetla in hyderabad. Technologically advanced tools and efficient and skilled technical workforce make a great combination to get best output and quality product.

Mission

our mission is to achieve the highest level of customer satisfaction by leveraging the best technology and after sales services as our priority. Our endeavor is to ensure total satisfaction for both our customer and all our staff and associates..
