Designed For Excellence

A special thanks to Mr. V. P. Dua, elder brother of Mr. S. K. Dua (Managing Director, Techno Engineers), without whom this company would never be founded. With all his guidance and kind support, we were able to establish this company where it stands today. Even today his vision and valuable inputs help us choosing the right path for the company to achieve new milestones.

Techno engineers is a leading manufacturer and supplier of widest array of car accessories, comprises of CAR FOOT MATS, MUD FLAPS (PREMIUM), AND O.E. TYPE STEERING COVERS AND CAR DOOR SIDE MOULDINGS.

The incessant desire to deliver our customers, upmarket, user-friendly and innovative products has always been the keystone of our success.

Our state-of-the-art plant, based at Delhi, employs professionals of the industry having rich experience and knowledge. They keep themselves abreast with the changes happening in the industry and bring the best of those in our products. Each and every single product, manufactured in our plant, goes under stringent quality control, and in environment friendly conditions, to ensure that our customer gets, nothing but the best product, every time. The highest quality of the material, procured from the leading vendors to give the best quality, right finish and long life. We are conforming to the quality standards of ISO 9001:2008 and are certified by the respective agency.

Today, our brand, Techo is reckoned amongst the top brands of this segment and enjoys good share of the market. Also we are supplying our products to some top notch automobile manufacturers of India, TATA MOTORS LTD. being one of those few.

Our range of products are well suitable for almost all Indian cars, ranging from Ambassador to Audi. We also give our customer the delight of owning something different by customizing our products according to their choice of design, sizes and colors.

Our products are widely available pan India through a nationwide network.

MUD FLAPS

TECHO Mud Flaps

With an experience of more than 27 years, 'TECHNO ENGINEERS' is renowned name in offering premium quality of vehicle MUD FLAPS that are widely used in AUTOMOBILE INDUSTRY. Manufactured from high quality flexible plastics, P.V.C. and advanced technology, these MUD FLAPS undergo stringent quality tests which ensures their durability and quality. Our MUD FLAPS are highly appreciated for elegant finish, flexibility, cost effectiveness [i.e. value for money], and temperature resistance to all weather conditions. The offered 'Techo' MUD FLAPS are available for almost all Indian cars from AMBASSADOR TO AUDI.

Mud flaps, also known as mud guard or splash guards, can help protect your vehicle from a lot of weather conditions and debris from the road. While driving on the road, your tyres are constantly coming in contact with rocks, mud, dirt, salt, tar, water and other elements found on the road. They also roll through rain, snow, ice, and the grimy slush. When this happens, this nasty slush, road grime or debris splatters onto your automobile paint. Over time this will corrode the paint and metal of your vehicle, creating in sightly rust that can inevitably hurt the frame of your car.

TECHO® auto accessories
Designed For Excellence

Highly Flexible It Does Not Break

- **Unbreakable**
- **Flexible**
- **Perfect fitment as per OE standard**
- **Superior Material PP+TPE Used for Durability**

- **Recyclable, Environment friendly**
- **Resistance to all weather conditions**
- **High functional value**

PROTECTION OF YOUR VEHICLE ON MUDDY ROAD

TECHU auto accessories
Designed For Excellence

YOU ARE PROTECTED

Let the road spit anything on your car. Our impact resistant, all weather Mud Flaps are ready to protect it.

WIDER IS BETTER

Our Mud Flaps are so well built to the maximum width for full tread coverage of wide tyres.

Installing Mud Flaps, though will prevent this from happening. It will create a barrier between the tyres and the wheel well, which protects the paint. Some may think that the Mud Flap is not necessary, but they are extremely beneficial for those who live in snowy or rainy climates. Mud Flaps will also help those who live in sandy areas or where you travel a lot of gravel roads.

TECHU auto accessories

**We Make
Full Range of
Mud Flaps from
Ambassador to Audi**

So once you realize how important your MUD FLAPS are and they are just not for off-roaders, you will have to make the choice of what kind you need. There are many different styles including custom made Guards that look very streamline. There are guards that are made of strong plastic and PVC. Plastic splash guards often found on cars, can withstand harsh weather condition and are durable enough to avoid cracking from debris. PVC flaps are most commonly found on truck and heavy duty vehicles. The PVC material is just as durable as plastic, but is more flexible. Both types of MUD FLAPS can easily be cleaned and can be driven through a car wash.

CAR DOOR BEADINGS

Owing to our illustrious business practices, we manufacture a wide range of high grade car body side moldings. Our skilled professionals manufacture these car body side beadings using the finest quality raw materials and ultra modern techniques at our well-maintained production unit. These car body side beadings are made suitable for almost all Indian cars. Our range of car door beadings are capable of withstanding atmospheric changes, particularly temperature variations. Apart from this, the product has long life, smooth surface finish, well matched colours with the car body and excellent O.E. pattern due to which these beadings are highly demanded in the market.

Made with high quality plastic PP+TPE which makes it Flexible, Unbreakable and Durable and its high shock absorption feature protects car side doors from minor dents and scratches.

FLEXIBILITY

SHOCK ABSORPTION

HIGH BONDING TAPE

- Remarkable adhesive strength.
- Excellent weather resistance of the tape.
- Resulting into durability and long lasting life.

Features:

- Flexibility
- Shock absorption
- Protection against impacts
- Lasting adhesiveness of the tape resulting into durability and long life
- Smooth surface finish
- Well matched colours with the car body
