About Us

Food & Biotech Engineers (India) Pvt. Ltd. is an ISO 9001:2008, 18001:2007, 14001:2004 Certified Co. We specialize in Dairy Products, Food Products, Fruit Products, Pharmaceutical Products, Biotechnological Plants along with Fabrication & Erection of Plant & Machinery, Dairy Processing Equipment, Dairy Processing Machinery and other Mechanical works, Industrial Equipment, Evaporators, Dryers, Pressure Vessel, Storage Tanks, Stainless Steel Piping & Structural Works etc. We have more than 15 years of experience in designing, fabrication and execution of projects on turnkey basis in the fields of 'fruit and vegetable processing, dairy plant & equipment, food & biotechnology. We have successfully executed several 'fruit & vegetable concentration plants' in India and abroad.

Infrastructure

The food processing industry is undergone an evolutionary change in recent years. Regular updation of plant, machinery and technology has created competition along with opportunities for improvisation. This is the reason before developing our infrastructure, we first looked at the standard of industry and foresaw the future of it. We have developed a state-of-the-art production facility and employed experienced professionals who can understand client specific requirements, working on safe plant installation, maintenance and improvement of processing unit. They back us to fabricate the finest ice cream plant, malted milk food plant, Herbal Liquid Extraction Plant, Wiped Film Evaporators, Rotary Vacuum Dryer and other products, as per industry and client's requirements. We are also backed by a team of quality experts whose knowledge and experience help in establishing the compliance parameters, and thus streamline the whole business process.

Before our project starts, we take care of precautions, that is to shield our machines to prevent against contamination. Our machinery including scaffolds, evaporators etc. are properly cleaned before installation. One of the prime factor in our industry is to prevent dust formation during insulation work, so we take special care to use non-dust forming materials to fabricate our range.

Our Products

Falling Film Evaporators

Agitated Thin Film Evaporators

Forced Recirculation Evaporators

Wipe Film Evaporator

Vacuum Shelf Dryer

Three Stage Dryer

Vacuum Band Dryer

Rotary Vacuum Dryer

Fluidized Bed Dryer

Herbal Extraction Plant

Percolator Extractors

Liquid Extraction
