

GRK 2100

Auto Ref/Keratometer

Faster and correct

Contact Lens Base Curve Measurement

User can check proper hard contact lens base with back side holder of model eye and can check condition of lens surface. It helps user prescribe customer lens exactly.

IOL MODE

Can measure and observe IOL inserted after extracting crystalline lens from cataract.

Cornea Refractive Power, Cornea Curvature Measurement

Wide area of spherical power from -25D to +22D and cylinder power from -10D to +10D can be measured using specially designed GRK 2100.

More exact cornea curvature can be measured from 5.0mm to 10.2mm by improved optical science design method.

Cornea, Iris, Cornea Size Mesurement

With image capture function of LED reflected image, cornea, iris, and pupil size can be measured conveniently.

Colored fogging Chart

Patient's eyes can be naturally fogged when measuring their eyes, so control interderence can be forbidden. Therefore, measurement reliability can be improved with more exact date.

Speedy printer

A speedy printing can analyze various measurement data easily.

Automatic power-saving mode

In case user does not use the machine for certain time (User can set using time at SET-UP mode), system is changed to power saving mode avoid unnecessary power consumption and overheating of inner circuit.

Higher resolution TFT LCD

With 6.4 inch TFT LCD, wide and superior image quality along with colored letters can be provided.

Automatic chin-rest control function

Chin-rest can be controlled automatically by one-touch button so that user can measure faster and easier.

Automatic PD Measurement

PD measurements are performed automatically after measuring binocular power, and it displays in LCD window.

Communication function among machineries

User can measure and analyze date from refractor, lens meter and other machinery using RS-232C

GRK 2100

SPECIFICATIONS

Measurement mode

REF/KER MODE	Continuous Refractometry and Keratometry
REF MODE	Refractometry
KER MODE	Keratometry
CLBC MODE	Contact Lens Base Curve Measurement
