TO WHOMEVER IT MAY CONCERN

I would like to give the feedback of using SRIRAM HERBALS GLUCO CARE on my patients. I am enclosing the feedback .

The first patient, aged 62, weighing about 130kg, severe diabetes and hypertension was on insulin, 20 units in the morning and evening. He was having fasting blood sugar around 300-350 and blood pressure of 195/110. Started glucocare on April 1st, three tablets before breakfast, lunch and dinner for a total of 9 tablets. Also started Slimcare for weight loss and changed the blood pressure medication. With strict guidelines of diet to help with the sugar control as well as weight loss. On 5th April, the fasting and postprandial were 193 and 249.

On 6th April 180 and 229. On 6th April he lost about 2kg weight, the blood pressure has also been coming down. On 8th April the blood pressure was 145/89. The fs and pp were 178 and 210. On 10th April, 180 and 207. The blood pressure 132/78. 14th April, 173 and 211. Was maintaining around 180 for fs. As of 24th April, 166 and 200. I have increased the glucocare by one more tablet morning and evening to bring more stability. The patient is happy that he has made good progress and he is also feeling more healthy and stable.
