# endless plank™

## The art of going a little further

The trend for longer planks is red-hot and Pergo is right on top of it with the floor that offers a little more. Through EndlessPlank™ Pergo introduces a feeling of floor planks that never seem to come to an end – taking what you enjoy a bit further.

EndlessPlank™ is a feature that creates an illusion of never-ending planks. As these decors – in Honey, Taupe, Barrista and Sand – match perfectly at each end, they form a continuous

design flow from the end of one plank to the start of the next.

The floor that lasts forever now goes on forever, too.

natural  
variation™

## When you love change

At Pergo, we don't settle for designing authentic looking decors – we push development by introducing smart technologies that make laminate flooring even more sophisticated.

Our innovative and patented feature Natural Variation™, for example, has added a whole new dimension to laminate floor design. Thanks to a special technique that randomly gives each plank a chalked and naturally rustic look, as many as

700 pattern variations are created. The result is an unbeatable and very unique combination. The naturally distinct character of wood, but with all the advantages of a laminate floor.
