ABOUT US

- We pleased to introduce ourselves as a manufacturer of Rubber Moulded items & registered with **TUV Austria** ISO 9001: 2008, further in connection of your requirement of molded, extruded & bonded Rubber items. We wish to furnish the information about us as under.
- **Vishal Rubber Technologies Pvt. Ltd.** was established in 1988 formerly known as **Vishal Plastic & Rubber Industries** with change in its Constitution in 2012 to Private Limited. It was established to service under a specific sector of rubber moulding industry and later into various extrusion and vulcanized products. It has been developed to service the high precision sector of the industry for customers who require volumes in the low to medium sector of the industry and who need a first class service in terms of quality and delivery.
- As the company has developed within this market sector, it has developed the compounding and testing equipments necessary to provide customers with a complete service with a material development, mould design and manufacturing capacity to handle Rubber Moulding, Rubber to Metal Bonding, Extruded Rubber Profiles, as per different specifications i.e – IS , ANSI, BS & DIN Standards
- For over decades **Vishal Rubber Technologies Pvt. Ltd.** has been solving the most difficult problems with rubber and rubber-like materials. In addition to the products, the necessary techniques are being incessantly developed. New products are diversifying the manufacturing programmes and new raw materials are reinforcing the foundation of the firm. The sole purpose is to attain technological self-reliance.
- The major problem in technology is the lack of information in a methodical, precise and continuous manner. **Vishal Rubber Technologies Pvt. Ltd.** ensures adequate flow of information through acquisition of published literature from domestic and overseas sources.
- Consumer satisfaction is ensured through adoption of foreign standards and technologies in manufacturing programmes, followed by quality assurance
- Needless to say that **Vishal Rubber Technologies Pvt. Ltd.** has gained a reputation for high standard of its products and its commitment to excellence and abiding concern for customer service.
- Unrelenting rise in cost of raw materials, machinery's and equipment poses major problems in present day competition, but utilization of modern concepts and technology has brought about reduction in cost through savings in material and energy, thus partially neutralizing the impact of escalation.
- Introduction of modern concepts and technology in a planned manner has resulted in proper utilization of experience and creativity of the work-force to solve work-related problems and ensure healthy shop environment. In fact, our biggest critics are our own professionals and we owe our excellence to them.

OUR COMMITMENT

Vishal Rubber Technologies Pvt. Ltd. Is committed to

- Obey The Law.
- Keep Accurate and Honest Records.
- Treat People with Dignity and Respect.
- Protect information, assets and interests of the company.
- Commitment towards Corporate Social Responsibility.
