

Color Printer Microjet Recorder Series

A Revolution in Recorder Technology

Ink Jet Technology

(Model :PHC)

The microjet recorder is a revolutionary recorder, its ink jet color printer technology is adopted in industrial type recorders for the first time in the world.

Fuji established ink jet technology based on the unique silicon chip manufacturing process for FCX transmitters.

The ink jet printing mechanism provides twelve continuous traces with a 180mm width recorder and six continuous trace with a 100mm width recorder without pen offset. The mechanism also provides six sharply defined colors.

Microjet recorder was designed with a reduced number of complicated mechanical parts to make it as trouble-free as possible.

The ink jet head is formed on a stable quality silicon chip. The ink jet head printing mechanism does not touch the chart paper, allowing reliable recording.

The ink jet mechanism is formed on a thin silicon chip (17.6 x 16mm) using silicon micro machining technology. It is provided with piezo elements. With voltage applied to the piezo elements, the shape of the elements changes as shown in the diagram, and ink particles are ejected from the tip of the nozzle. These particles are very small and fast, and draw a series of very small dots of about 0.3mm diameter on the chart paper. These small dots are combined together to form characters and trace lines for clear visible recording.

6 Color High Quality Trace

Instantaneous value
 Chart speed

 Alarm ON

Alarm OFF

Tag No./Tag name

The ink jet printing mechanism allows continuous recording for a maximum of 12 channels (6 channels with 100mm width recorder) in 6 different colors. An A/D converter is used for each input signal for high speed data sampling to obtain a trace similar to that obtained by conventional pen mechanism recorders. Digital printing is also possible in the same color as the channel color, so clear and visible recording can be obtained. (for model PHA, PHC)

Report Generation

Daily report/totalization

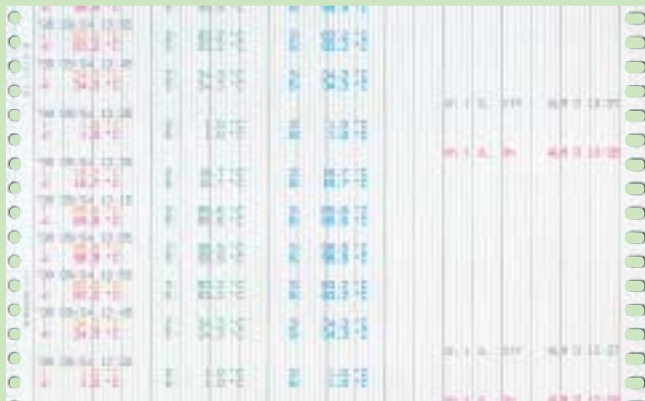

On a daily report, measured values for every hour are printed along with maximum, minimum and average values.

On a totalization, integrated values at intervals of 1 hour and the total value for one day are printed.

Zoom, zone, auto-range trace

Special traces that match the operating conditions of the plant are available.

Logging print

Printing of measured values at intervals of 10-60 minutes.

Note: Analog trace is not available for logging printing.

Parameter list, test pattern

Configuration data can be checked with parameter list.

A test pattern of all colors and all combinations of colors is available.

■ Continuous recording

- 6 colors
- 180mm width, 12 channels
- 100mm width, 6 channels

■ Digital data printing in channel color

■ Self-printing scale in channel color

■ Tag No./Name printing in channel color, 8 digits (Max)

■ Message printing in 6 color

■ Long life recording

6 months continuous operation with one cartridge.

■ Color on each channel is selectable

The following status printing is available for analyzing recording results.

- Alarm
Red at alarm ON, black at alarm OFF, Channel No. and time are printed
- Burnout
- Ink shortage
- Recording start mark
- Chart speed change mark

■ High reliability recording

- 6 colors continuous trace

- Ink is not soluble in water, excellent water/sunlight resisting characteristics.

■ Compact and light-weight design

- Mass (weight): 2.1kg/100mm width
- 6.0kg/180mm width

- Depth: 199mm

■ Simple choice

- The 100 and 180mm width recorders are configurable on each channel and accept most industrial inputs.
- The recorder operates on AC power 100 to 240V.

■ RS-485 Communications

Simple Operation

4-key operation (with door closed)

German and French languages can be displayed.

(PHC)

- A. Record start/stop key
- B. Display select key
- C. Measured value print key
- D. Chart feed key

(PHA)

4-key configuration (with door open)

Configuration can be done according to operation guide

(PHC)

- E. Select key
- F. Up key
- G. Down key
- H. Data entry key

(PHA)

Simple Design

Simple Design

The ink jet mechanism is simple in design.

Electronic parts are increasingly used in the recorder.

Mechanical parts have been reduced to about 1/3 that of conventional recorders and it comprises about 2/3 of the total number of parts.

The small size (199mm deep) contributes to panel cost saving.

Fully Configurable input

This recorder accepts multiple inputs.

With a process input, it can record and print the results of filter, square-root extraction, subtraction calculation and scaling for each channel.

Reduced Maintenance

Complicated servo mechanism is not used.

Each input has its own input circuit.

Unlike conventional recorders, input scanning relays are not used and hence trouble-free operation is ensured.

Specification Summary

			
Model		PHC	PHA
Chart width/length		100mm/15m	180mm/20m
No. of input channel		3/6	6/12
Input Signal type		TC (J, K, E, R, B, S, T, L, U, W, PN, N), RTD, DC V ($\pm 50\text{mV}$, $\pm 500\text{mV}$, $\pm 5\text{V}$, $\pm 50\text{V DC}$), DC mA	
Measuring cycle		160/320ms.	320ms.
Accuracy	Display Accuracy	$\pm 0.15\%$ of measuring range, ± 1 digit without cold junction compensation error	
	Analog Trace Accuracy	Display accuracy $\pm 0.25\%$ of measuring range	
Display		Fluorescent (20 characters x 2 lines)	
Chart speed		5-400mm/h continuous trace 401-1500mm/h intermittent trace	5-300mm/h continuous trace 301-1500mm/h intermittent trace
Recording cycle		Recording cycle (sec.) = $\frac{400}{\text{Chart speed (mm/h)}}$ Recording cycle is more than 2 seconds.	Recording cycle (sec.) = $\frac{450}{\text{Chart speed (mm/h)}}$ Recording cycle is more than 3 seconds.
Calculation *		Square root extraction, Subtraction, Scaling, Input filter, Logarithm	
Report Generation		Daily report, Totalize list, Parameter list, Test pattern, Measured value list, Logging print, Message print	
Alarm		H, L, RH, RL for each input, Burnout, Ink-out, Chart end, Battery alarm	
Option	Alarm output	6 Relay output	6/12 Relay output
	Remote control	Record start/stop, Chart speed change, Measured value print, Message print	
	Communication	RS-485	T-Link
	Chart Illumination	Cold cathode fluorescent	
Power supply		100 to 240V AC or 24 DC (Usable Range 85 to 264V AC or 21.6 to 26.4V DC)	
Environmental		Temperature: 0 to 50°C Humidity: 20 to 80%RH (Temp. (°C) x Humi. (%RH) < 3200)	IEC IP50
Mass {weight} Approx.		2.1kg (without options)	6kg (without options)
Applicable standard		CE mark	

* Consult Fuji Electric Instruments for additional features not listed such as flow integration record and calculation of input signal, etc.

Transmission function														
					Y								Without	
					T								With T-Link	

Note) 1. Input signal

Setting prior to delivery is as follows;

- Thermocouple K: 0 to 1200°C
2. Shunt resistor (10 Ω ± 0.1%) should be ordered separately for current input.
Shunt resistor : Ordering code PHZT8101 for PHA, PHZT1101 for PHC
 3. T-Link transmission function is Fuji's original PLC Link transmission function

Dimension of PHC (100mm width)

Dimension of PHA (180mm width)

Microjet Recorder-E PHE

Inkjet technology, previously available only on expensive printers, is now available on a strip chart recorder at an affordable price, a price that falls below the cost of some dot matrix type printers. If you note the comparison between the dot matrix and inkjet typeface, there simply is no reason to use a dot matrix type recorder anymore.

- This recorder has basically 2 models, user programmable model and factory configuration model.
- Factory can pre-configure recorder parameters with customer supplied information prior to shipment, reducing the users' total installation cost and time.
- In case of 1 or 2 continuous recording, 2-color type Ink cartridge (PHZH2002) is also available. Since its life-span became longer than before, you can cut the running-cost in 1/4-1/2.
- Real time clock (calendar) function is available with standard specification.

Specification Summary

Model		PHE1	PHE2	PHE7, 8, 9
Chart width/length		100mm/15m		
No. of input channel		1	2	6
Signal type		TC (J, K, E, R, B, S, T, L, U, W, PN, N), RTD, DC V ($\pm 50\text{mV}$, $\pm 500\text{mV}$, $\pm 5\text{V}$, $\pm 50\text{V DC}$), DC mA		
Input/Recording range		User programmable or factory configuration		
Measuring cycle		200ms/point		30s/all point with input scanning relay
Accuracy	Display Accuracy	$(\pm 0.3\% + 1 \text{ digit})$ of measuring range (DC voltage, DC current input)		
	Analog trace Accuracy	Display accuracy $\pm 0.2\%$ of measuring range		
Display		LED (7 segments x 6 digits)		
Chart speed		10/20/24/30/50/120/200/300/400 mm/h		10/20/24/30/50/120/200/300/400/1000/1200/1500 mm/h
Recording cycle		Recording cycle (sec.) = $\frac{400}{\text{Chart speed (mm/h)}}$ Recording cycle is more than 2 seconds.		30s/all point
Printing function	During analog recording	Channel No., Periodic data, Scale, Alarm, Burnout, Date and Time		
	Independent of analog recording	Instantaneous value list, Parameter list, Scale list, Test Pattern		
	Other	Recording start mark, Chart speed change mark		
Alarm		L/LL, H/L, H/HH		
Option	Alarm output	2 relay output	4 relay output	6 relay output
	Remote control	Chart speed change		
Power supply		100 to 120V AC or 200 to 240V AC		
Environmental		Temperature: 0 to 50°C IEC IP50 Humidity: 20 to 80%RH (Temp. (°C) x Humi. (%RH) < 3200)		
Mass {weight} Approx.		1.2kg (without option)	1.2kg (without option)	1.5kg (without option)
Applicable standard		CE mark
