- 1. Frame :** Robust all steel structure made out of 19mm dia 16 swg ERW steel tube-IS-7138 / 12 mm double contour hot Pressed Plywood.
- 2. Powder Coating :** Thermostat Powder Coating by applying Epoxy Polyester Hybrids pre treated for decreasing and Derusting followed by zinc Phosphating – HB – 7H Pencil hardness and 50 micron thickness
- 3. Seating Structure & Upholstery :** Made out of ERW steel of 16 g (IS-7138) / 12mm double Contour hot pressed plywood. Ergonomically designed Seat and back structure having appropriate bends for Adequate lumbar support . Seat and back are upholstered With non-deformable pre molded foam of 45 density and Fixed with quick drying spray glue and polyester fabric. The Form should also have a tensile strength of 1.0 KG / Cm Square, hardness at 50% deflection of 33.34 K g f and 24.6 at 25% deflection.
- 4. Fasteners :** High quality metal screws & high tensile fasteners Confirming to IS – 2269.
- 5. Polyurethane Arms :** Molded polyurethane arms with steel inserts. Self – skinning molded PU arms, maintenance free with density 400 – 500 g / ltr confirming to IS – 7078 with hardness of 50 – 70 A
- 6. Chair Legs :** Robust all steel structure made out of 25.4 mm dia 16 swg ERW steel tube confirming to IS – 7138.
- 7. Multi Contact :** Back is provided with springs for flex mechanism when necessary.
- 8. Pneumatic Lift :** Stroke length of 100 mm with (F1= 400N) and confirming to DIN 4551
- 9. Tilting Mechanism :** Main plate and synchro housing is made out of CRCA steel sheets confirming to IS 513 – 1963. Tension spring made out of grade II spring wire of diameter 7 mm confirming to IS –4454. The Tilt I synchronized to 1:3 ratio for seat and back tilting.
- 10. Twin wheel castors :** 50 mm diameter wheels made out glass fill nylon (30/70) Which are abrasive resistant on axial pin and smooth movement on flooring confirming to BIFMA standards.

Winners Choice to successful environment

Company Profile

11. **Fabrics :** Dyed fabric with abrasion resistance standard confirming to Number of movements required to rupture two threads at 9 Kpa pressure being 83500, breaking load for 5 cm x 20 cm Raveled strips being 157.7 for Wrap , 158.9 for Welt.
