INTERNET LEASED LINE SERVICES

What Is Internet Leased Line ?, Why We Need It ? & Its Advantage over Simple Internet Services ? !!!

It is internet connectivity product which is used by organizations or individually for Internet access where data consuming is very heavy, as this is use for heavy consuming so it's data transfer rates is very fast and cost-effective. A leased line having a fixed -bandwidth symmetric data connection. It basically used for add or link two location together, first location is any corporate office and other can be corporate office, any internet data center and existing WAN company.

It is also used for connect internet, link PC or Server for any other corporate office and enable staff for connect home office with work office. As leased line are Symmetric it means you can upload & download data with same speed. For transfer large file, upload sizable files, online data backup, host website on server and VoIP telephony leased line is a perfect choice. Along this Leased line connection is more suitable for carry different types of data traffic like as phone calls, Internet traffic & corporate VPN traffic.

Leased line most popular speed connection are 2Mbps, 10Mbps and 100Mbps, along this you can avail speed of 10,000 Mbps/s (10 Gigabits per second) if cost no matters.

KEY ADVANTAGES of SPECTRANET's INTERNET LEASED LINE SERVICES:

- Better reliability & Excellent support
- Never slow down at peak times
- Find cost effective and hassle free services for your business
- Excellent Leased Line Connectivity Service
- It is a secured connection between two offices for private data transfer
- Point-to-point connectivity for Voice, Data, Video & more
- Faster upload & download speeds are usually available
