# About Us

Our company, **PressureJet Systems Pvt. Ltd.** has been dedicated to providing best-in-class services and products to its valued customers for over 20 years. It has considerably surpassed the standards set by different Indian subcontinent companies in this process.

We manufacture the most comprehensive line of high-pressure triplex plunger pumps, with pressures ranging from **850 psi (60 kg/cm<sup>2</sup>) to 20000 psi (1400 kg/cm<sup>2</sup>)**. Our product line is designed to suit the needs of the majority of customers in a variety of applications and industries. Hydro jetting, high pressure cleaning, hydro blasting, sewage jetting, hydrostatic pressure testing, misting, firefighting, metal powder atomization, wet sandblasting, descaling, fin tube cleaning, fogging, paint or rust removal, and dust suppression are just a few of the services we offer.

## Our Strengths

PressureJet pumps are designed for a wide range of applications. We have been developing for the past few years. Our company has a long history of exporting and manufacturing High-Pressure Triplex Plunger Pumps. Our continual efforts to manufacture a wide range of products of high quality have assisted us to become the forerunner in our country. In addition, our constant efforts to improve infrastructure allowed us to provide exceptional quality tailored goods for a wide range of applications.

## Quality Control

Among the high-pressure plunger pump producers in India, our company is facilitated with the most advanced quality-control equipment. As a result, the quality of our company is a cut above the others. For the products, our company adheres to international quality requirements.

Finally, our company has invested more than 10 million rupees in building a quality control department that inspects all-important precision engineering pump components in a regulated environment. It now employs 257 advanced and diverse quality-control tools throughout the manufacturing process, from raw material acquisition through final testing and inspection of pumps before shipping.
