## KNOWLEDGE ABOUT SCIENCE OF LIFE AND WELL BEING

Ayurveda in Sanskrit means Life Knowledge whereas Ayu denotes for Life and Veda denotes for Knowledge. There fore it is knowledge about Science of Life and Well Being of Mankind, The origins of Ayurveda have been traced back to around 5,000 BCE, when they originated as an oral tradition. Some of the concepts of Ayurveda have been discovered since the times of Indus Valley Civilization. The first recorded forms of Ayurveda as medical texts evolved from the Vedas. Ayurveda is a discipline of the upaveda or "auxiliary knowledge" in Vedic tradition. The origins of Ayurveda are also found in Atharvaveda, which contains 114 hymns and incantations described as magical cures for disease. There are various legendary accounts of the origin of Ayurveda, e.g. that it was received by Dhanvantari (or Divodasa) from Brahma. Tradition also holds that the writings of Ayurveda were influenced by a lost text by the sage Agnivesa. Ayurveda is one of the few systems of medicine developed in ancient times that is still widely practiced in modern times. Ayurveda names seven basic tissues (dhatu), which are plasma (rasa), blood (rakta), muscles (mamsa), fat (meda), bone (asthi), marrow (majja), and semen (shukra). Like the medicine of classical antiquity, Ayurveda has historically divided bodily substances into five classical elements (Sanskrit – maha-pancha-bhuta), viz. earth, water, fire, air and space. There are also twenty gunas (qualities or characteristics) which are considered to be inherent in all substances. These are organized in ten pairs of antonyms: heavy/light, cold/hot, oily/dry, dull/sharp, stable/mobile, soft/hard, non-slimy/slimy, smooth/coarse, minute/gross, and viscous/liquid. Ayurveda also names three elemental substances, the doshas (called Vata, Pitta and Kapha), and states that a balance of the doshas results in health, while imbalance results in disease. According to Ayurveda, health is not a state defined by lab tests or yearly check ups. Health is a continuous and participatory process that embraces all aspects of life: physical, mental, emotional, behavioral, spiritual, familial, social, and universal. Plant-based treatments in Ayurveda may be derived from roots, leaves, fruits, bark, or seeds such as cardamom and cinnamon. The addition of minerals to herbal medicine is called rasa shastra In olden days humans lived closed to Nature and whenever they were indisposed they cured themselves by the resources and materials provided by Nature. The field of Ayurveda comprises to give solutions for all kind of diseases which was considered impossible by other field of Medical Sciences. Ayurvedic medicines are prepared mainly from the Herbs and said to have no side effects and works effectively fighting against various infections and diseases. These medicines are also helpful in Naturally fresh & Healthy Skin, in preventing Hair Loss and Graying, removal of pimple acne and dark circles, providing rejuvenation and increasing Vigour and Vitality in Humans. The Ayurveda which is mainly based on the herbal treatment promises wonders to mankind when taken in a wise and prudent manner. **Vaidyamrit Vaidya is a Sanskrit word meaning "physician" and refer to a person who practises ayurveda, an indigenous Indian system of medicine.**

**"Amrita" is derived from a Sanskrit word that literally means "without death", and is often referred to in the Rig Veda as Soma and or Nectar.** Corresponds to the Greek ambrotos (ambrosia). In the Rig Veda Hymns, Soma, Amrita and Nectar are found as descriptive terms for the same "plant/God/drink" so the Soma or "pressed" drink was Amrita or "without death" and it was also the nectar or "death overcoming." In ancient Indian Ayurveda the God's Drink prepared by Vaidya's been served as Vaidyamrit for cure of diseases and illness.
