Features And Benefits

A Wide Pump Range

* We offers submersible pumps with energy-efficient duty points ranging from 2 to 160 m³/h. The pump range consist of many pump sizes (Stages) to match any duty point.

High Pumps Efficiency

* Often pump efficiency is a neglected factor compared to the price variations are without importance of pump and motor efficiencies.

Example

* Pumping water-30m³/h with a head of 60 meter.

* When choose stainless steel energy efficient pump, be saved (than other pumps) 4unit (kwh) per hour.

* It save Rs. 4,60,000 in 10 year for 8 hours / day running)

Applications

* We offers a complete range of pumps and motors with as a standard are made completely as stainless steel - 304. This provides for good wear resistance and a reduced risk of corrosion when pumping ordinary cold water with a minor content of chloride.

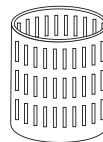

Low Installation Cost

* These pumps have low weight facilitating the handling of pumps and resulting in low equipment costs and reduced installation and service time. In addition pumps will be as new after service due to the high wear resistance of stainless steel.

Bearing with Sand Channels

* All bearing are water-Lubricated and have a octagone shape enabling sand particles.

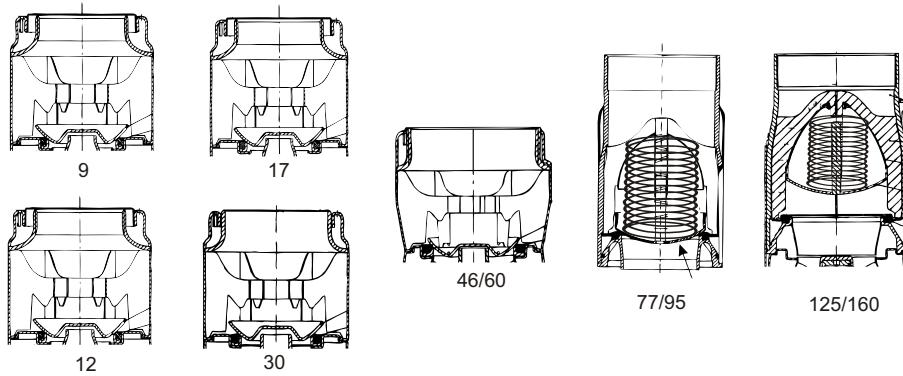

Inlet Strainer

* The inlet strainer prevents particles over a certain size from entering the pump.

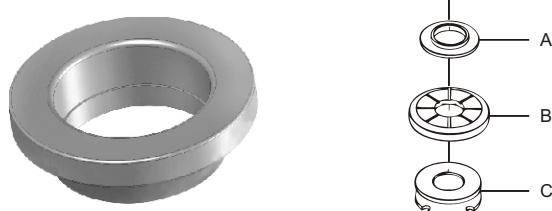

Non-Return Valve

* All pumps are equipped with a non-return valve in the valve casing preventing back flow in connection with pump stoppage.
* Furthermore, the short closing time of the non-return valve means that the risk of destructive water hammer is reduced to the minimum.
* The valve casing is designed for optimum hydraulic properties, to minimize the pressure loss across the valve and thus contributes to the high efficiency of the pump.

Stop Ring

* The stop ring prevents damage to the pump during transport and in case of up-thrust in connection with start-up.
* The stop ring, which is designed as a thrust bearing limits axial movements of the pump shaft.
* Example : OSP - 30

GENERAL

* Curve tolerance according to ISO 9906, Annex A&B.
* The performance curves show pump performance at actual speed of standard motor range.
* The speed of the motors is approximately:
N=2850 min⁻¹
* The measurements were made with airless water at a temperature of 20°C. The curves apply to a kinematic viscosity of 1mm²/s.
When pumping liquids with a density higher than that of water, motors with correspondingly higher outputs must be used.
* The bold curves indicate the performance range.

Features And Benefits

Material & Design for wear & corrosion resistance

Stainless steel submersible pumps can run very well in cold and clear water however Ground water abrasive like sand which can quickly wear out both the pumps and motor. **OSWAL** has designed & developed the OSP series pumps which are made completely out of High grade stainless steel and rubber of excellent quality to ensure that the sand abrasive. Do not wear out the pump.

High pump efficiency & Minimum cost :-

The initial cost of purchasing a pump is a fraction of the total cost of owning & operating a pump over its entire life span. High pump efficiency and minimum cost is thinking about the total cost of ownership during the entire life span of the pumps .it means that you should know and ensure that energy cost and maintenance cost which contribute 95% of the total cost of ownership is brought down as much as possible . it also means the benefit of business relationship with **OSWAL** pumps like assistance in making the correct decision about the performance over the life span of the pumps.

OSWAL OSP series pump can help you , bring down the operating cost by offering higher pumping efficiency, due to excellent hydraulic design and using high strength stainless steel material which offer high wear resistance. Which significantly reduces energy consumption . **OSWAL** can also help you by providing during selection and installation of the pump.

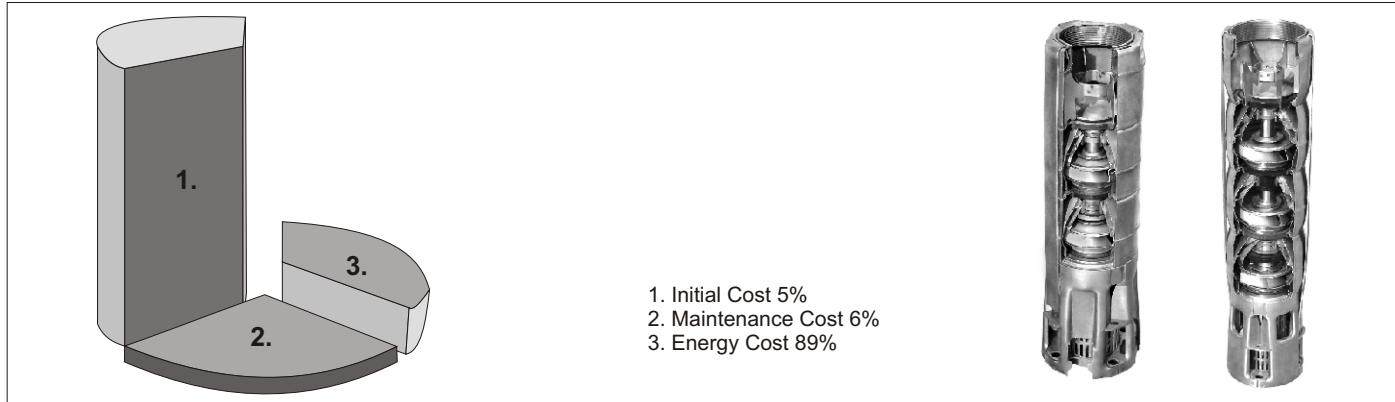

Energy efficient pumps :-

Calculate the energy cost in KWH/ M³ or KWH / gallon which includes losses in motor ,pump, cable etc. **OSWAL** offer OSP series pumps with highest efficiency in the industry.

Let us the compare energy cost between ordinary pump XYZ against the OSP series pump manufactured by **OSWAL** pumps ltd.
