

REFRIGERATED LIQUID BATH (LI-RLB-19)

APPLICATION :

Refrigerated water bath is used for many research lab, chemicals lab, microbiology lab etc.

FEATURES :

- Double walled construction.
- Tank and lid made of SS. Outer made of MS duly powder coated.
- Insulation between two walls is done by special grade glass wool.
- Whole unit is mounted on a sturdy angle frame.
- Cooling is done through CFC free hermetically sealed compressor.
- Temperature controlled by Digital Temperature Indicator-cum-Controller.
- The unit is fitted with a FHP pump for circulating the liquids via an external source as condensers, coils etc.
- Unit is mounted on four wheel base for easy movement.

TECHNICAL SPECIFICATIONS :

Model : LI-RLB-19	
Tank size	450 x 300 x 300mm
Capacity	42 Ltrs
Temperature Range	-5°C to 90°C
Temp. Accuracy	±2°C
Circulation through	FHP pump
Temp. Controlled by	Digital Temperature Indicator-cum-Controller
Power	230V AC, 50Hz
