LOG PEELING MACHINE (ROTARY VENEER LATHE) (8-Foot Size)
Model :- R.V.P.H.D 1500 X 2750 C125 LM

Technical Specification :

Veneer Cutting Knife Length	-----	2750 mm
Swing dia. (Max. Log Diameter)	-----	1400 smm
Diff. Veneer Thickness	-----	0.25 mm ~ 3.00 mm (Standard)
Min. Block Length to be peeled	-----	1350 mm (Using Spindle Attachment Stand)
Min. End Core Diameter	-----	130 mm
Max. Spindle revolution	-----	0 ~ 150 rpm. (Variable Speed Drive System)
Total Power Required	-----	100 Kw (Main Motor 74 Kw)

Features:

- Heavy Duty Construction
- Easy to operate and user friendly
- Inbuilt Variable High Speed Technology
- Uses Hydraulic and Pneumatic functions
- Ideal for Peeling Large diameter Logs
- Chucking by Screw Type motorised spindle
- Unique design to suit Face and Core veneer production line
- Suitable for Tropical and Plantation Wood Species

NOTE: MODIFICATION IN MODELS CAN BE MADE WITHOUT ANY PRIOR ADVANCE NOTICE FOR UPGRADATION PURPOSE.
