

### Single Loop FIBC Bags for Fertiliser Industry

Glasnost India was incorporated in the year **2006**. It offers products are manufactured under the strict guidance of our experts using optimum grade fabric and other materials. Owing to good quality and durability, these find application in fertiliser pharmaceutical, speciality chemicals, food industries and speciality industries.

Our range of product includes:

1. Single & Double Loop FIBC bag with air releasing vent.
2. Conductive C & D type Jumbo Bags
3. Net baffle jumbo bags
4. Liquid flexi bags
5. Liners
  1. Baffle liners
  2. Conductive liners
  3. Round drum liners
  4. Aluminium Multi layered Jumbo Liners for Water based Fertilisers.
  5. PVC Jumbo Liners,
6. PVC Dunn-age Bags

### **Single Loop FIBC:**

Single Loop Bags with suspended inner LD liners with air releasing vent are our main product.

- Volume between 1000 Kgs to 1500 Kgs.
- Extremely strong and durable for long storage.
- Air releasing vent ensures no degradation of fertilisers and long life.

### **Baffle Jumbo Liner**

Globally, these **Baffle Jumbo Liner Bags** are widely used by the clients for their unmatched features such as:

- Non bulging strength
- High sturdiness
- Optimum utilisation of volume

### **Liquid Flexi Bags:**

As the name suggests, these are manufactured only for liquid material.

#### *Key Points of Liquid Flexi Bulk Bags*

- Volume between 1000 liters to 1500 liters
- Closed system ensures sterile conditions
- Leakage proof
- Provided with a wooden assembly for storage and long distance transport
- Standard Limit Values of maximum liquid density, etc.

### **Anti Static Jumbo Bag**

These are widely used in various industries and are suitable for carrying dry flammable powder. Some of the striking features of Anti Static Jumbo Bags are as follows:

- High conductive strength
- Light in weight
- High load bearing capacity

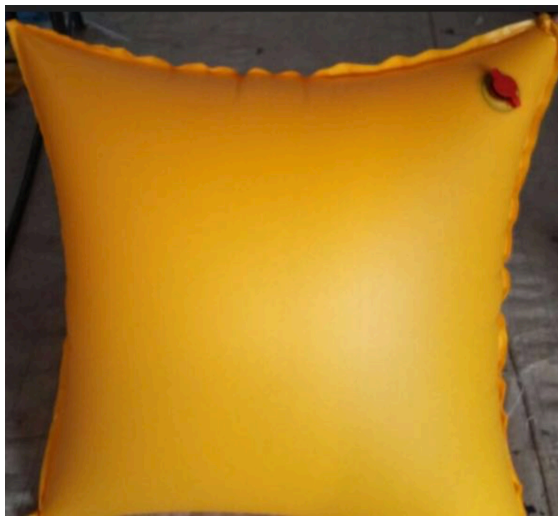

### **Net Baffle Jumbo Bags**

Baffle Jumbo Bags are made up of Net baffles, which gives, extreme non bulging properties to the bag as well as steadiness and allows the material to flow into all the nooks and corners of the bags.

### **Multilayer Aluminium Laminated Liners for Water based Fertilisers.**

These multilayer liners are used mainly for storing extremely hygroscopic and temperature sensitive products for long duration of time to keep it in the same condition and retain its original physical form and chemical properties.

### **PVC Or vinyl dunnage bags:**

They are used in

- Storing cold chain or cold chain refrigerated containers
- Warehouses for cushioning purpose
- Store the material in the same physical condition as before.
- Vinyl Dunnage bags have unique properties of not cracking under sub zero temperatures
- Are durable in harsh conditions for a long period of time.

### **Round Drum Liners:**

- They give extra volume and optimum utilisation of space for storage of products and liquids in barrels from 10 litres to 220 litres.
