Reticulated Gas System

Reticulated Gas System or Piped Gas System is already a pioneering system gaining popularity in India. This system supports in getting LPG in homes, but keeps the standard cylinders at bay. The LP gas needs for kitchen is met with reticulation and solves issue of making safe gas reach homes with ease.

Choose Reticulated Gas System

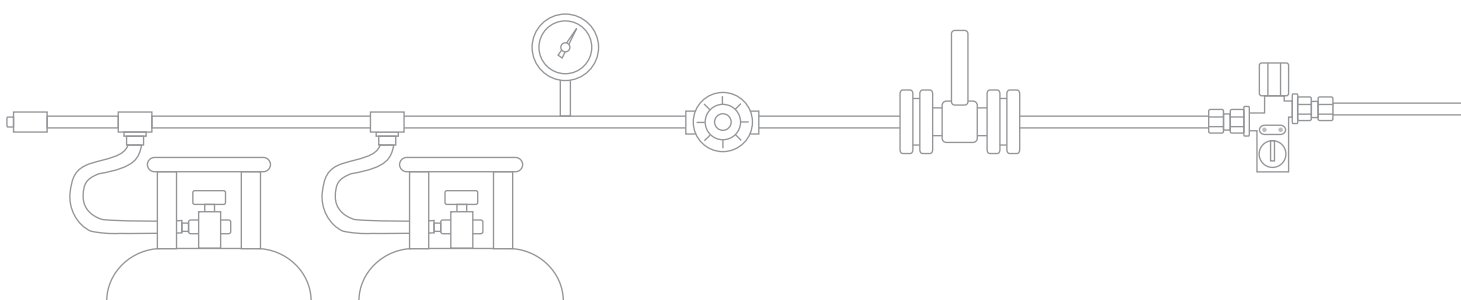

This system is the newest facility for the builders to keep things simple for their customers.

Oil companies have been providing piped LPG to housing ventures in metros and key cities.

Made to suit individual needs with safety, the customer's frustrating refilling days will be over. Plus, latest customer-friendly equipments are used with this system.

Advantages of Reticulated System

Choosing Reticulated Gas System might be advantageous on diverse levels.

Safety First

The secure installation & commissioning of the system is done by the company. Chances of leakage, fire scare and such troubles are cut off.

Free Connection

Customer does not need previous or new gas connection and so escape the clutches of formalities or waiting period.

Financially Viable

The buyer just needs to shell out charges as per use and company rates. With meter facility to keep usage data, the economical piped gas might be an attractive gift.

Uninterrupted Supply

One can avail uninterrupted gas supply throughout the year including holidays.

Minimum Upkeep

With after-sales service & support, the maintenance includes checkups at intervals for a small amount and training to the residents.

Environment-friendly

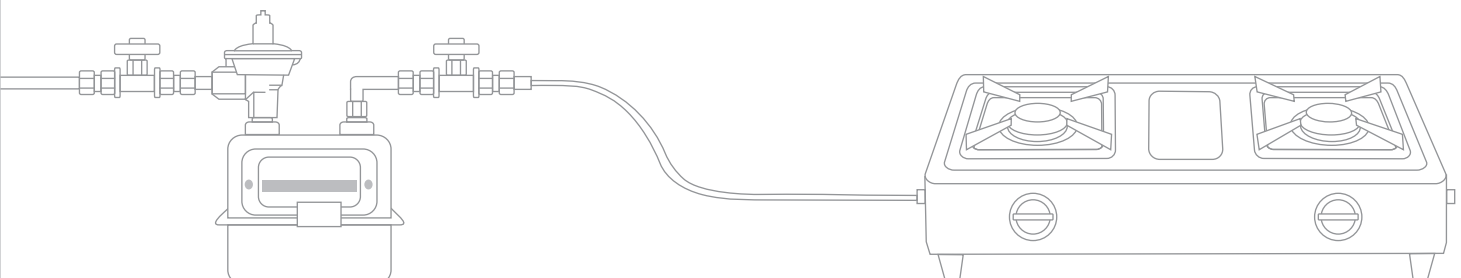

With many choosing nature-friendly options for their homes, providing clean maintenance-free fuel in easy fashion would be an attractive point for the customers.

Added Value

Providing a gas connection like this would be a great point of focus and is an asset for any home. Such alternative would be a crowd-puller.

At Ease

Without any cylinders, the kitchen looks better visually and the floor doesn't suffer.

Why Sohum

We have competency in installation and after-sales support & service for the last several years.

We provide most competitive & safe system design.

We have trained manpower for handling customer complaints & maintenance.

We have our own range of manufacturing of regulators & safety devices used in the system which govern its performance.

We have core strength in LPG & CNG installations in residential, commercial & OEMs in industrial sector.
