

# Optimizing pressure at home

## Your Home Sleep Testing and long-term CPAP solution

REMstar Pro with CPAP Check mode and REMstar Auto with Auto Trial and CPAP Check mode are continually curious about your patients' treatment needs and smart enough to help you deliver exceptional patient therapy month after month, even when you're miles away.

### Enhancing patient compliance

CPAP Check mode checks on the user every 30 hours to determine if therapy pressure is optimal. If not, it automatically adjusts the nightly fixed CPAP pressure by 1 cm H<sub>2</sub>O (with maximum upper and lower limits of 3 cm) to obtain an ideal pressure.

REMstar Pro with CPAP Check benefits:

- Therapeutic pressure is continuously monitored
- Long-term enhanced patient care – patients are moved toward an optimal CPAP pressure
- Therapy adapts to patient's pressure needs over time, above all, when they slowly change conditions
- Less intervention in the patient's home to change pressure settings when the patient's condition changes

Auto Trial mode delivers breath-by-breath Auto-CPAP therapy for up to a total of 30 days. At the end of the Auto-Trial period, the device will automatically transition into the CPAP Check mode at the 90% auto CPAP pressure.

REMstar Auto with Auto Trial and CPAP Check benefits:

- Provides clinicians the opportunity to do the titration (auto-adjusting CPAP) at home and then deliver CPAP treatment automatically without having to go to the patient's home to switch modes
- Reevaluation of therapeutic pressures for patients who experience a return of symptoms
