Product Highlights

SEMI-AUTOMATIC

- Robust 44"/64" wide format
- Direct print technology
- 1000 Sq.Ft per day
- RIP software not Required
- UV lamp not required
- Head will be maintained even if it's idle for long period
- Maintenance free
- Per dot (.) 8 pixels printing
- Lexy Printing Technology
- Non hazardous chemicals
- Ultrasonic Wave Setting

FULLY-AUTOMATIC

- Robust 64" wide format
- Direct print technology
- 2000 Sq.Ft per day
- RIP software not Required
- UV lamp not required
- Head will be maintained even if it's idle for long period
- Maintenance free
- Per dot (.) 8 pixels printing
- Lexy Printing Technology
- Non hazardous chemicals
- Ultrasonic Wave Setting

Company **PROFILE**

Lexy is providing stone printing service since 2006 to the Indian and International Customers. It's specializing in printing on Granite monuments and on marble slabs. Lexy is also printing on glass, tiles and wood.

Lexy has been providing such printing service using halide based exposing technology.

Recently, Lexy has introduced the commercial printing technology with wide format printer, It has many advantages over other technologies.

Lexy in the years to come has been promoting this concept and technology as a package with different applications and business opportunities.

Rather than offering the printing service, the business owner with this technology can produce products of our suggested print products and sell to their dealers and customers.

Lexy is a state of the art technology, with lot many advantages like cost effectiveness, easy to apply, easy mobility, possibility of installing at the customer locations, very less power requirement, less space requirement, maintenance free, scratch proof, rugged and tough print surface, chemical based transfer and so on.

2006 - 2018

Wider Applications

Gemstone Slabs are very expensive and its price ranges from Rs.2000 per sq.ft to Rs.15000 per sq.ft.

Lexy technology has made possible of converting Low Prices white marble to Gemstone Slab with a cost of Rs. 150 per sq.ft. depending upon the quality required.

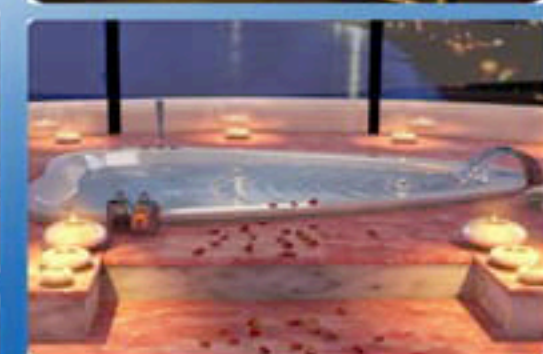

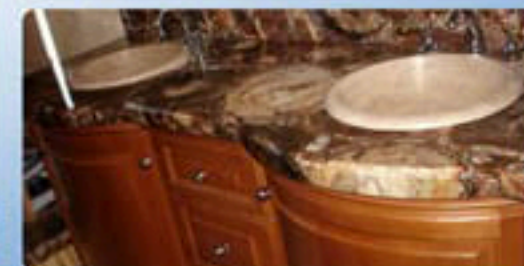

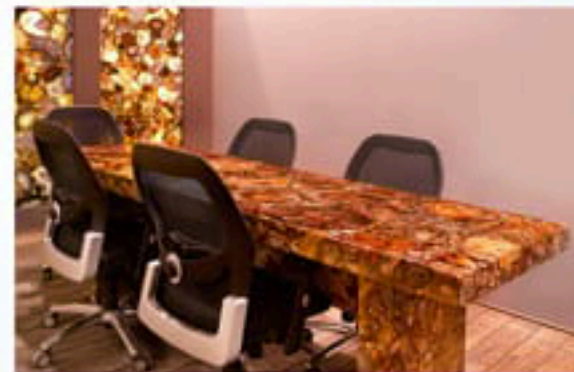

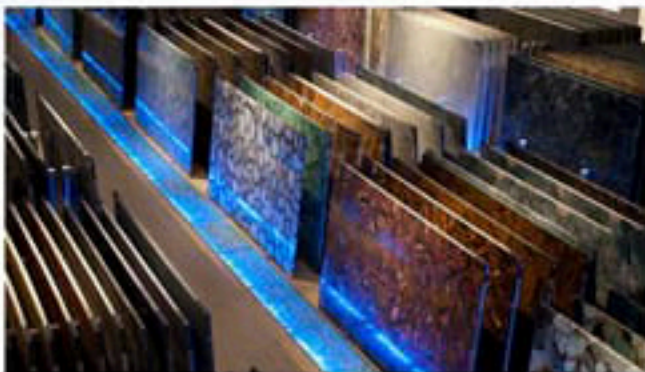

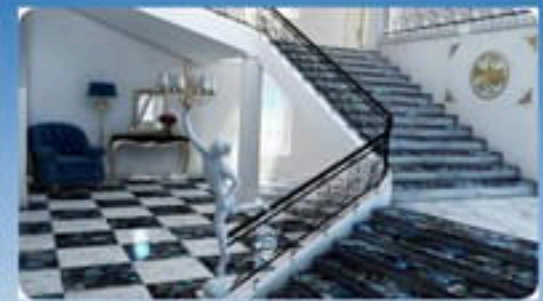

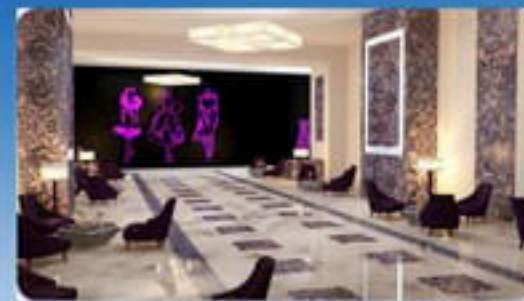

Printed Marble Gemstone Slabs will have the same translucent and aesthetic appeal as such of original Gemstone.

Marble Gemstone Slabs will make the value addition to the low cost white marbles as a premium products.

The quality will be as superior as the original gemstone slabs but at a very less cost.

**What
Can be
Produced?**

Marble Gemstone Slab

**BEST
QUALITY**

Printed Wooden Furniture

Lexy Vapour/Vaccum Technology is an excellent solution for manufacturing Printed Wooden Door & Furniture. Printing with Glossy Scratch Proof Coating will give the printed material, a classic look and appeal.

The Cost of printing and finishing in this technology is comparatively very less.

The application of such print with scratch proof coating and glossy or matte finish are wide and unbounded.

**What
Can be
Produced?**

**Wider
Applications**

Architectural Glass Prints

Glass Printing are widely used in the field of architecture now a days.

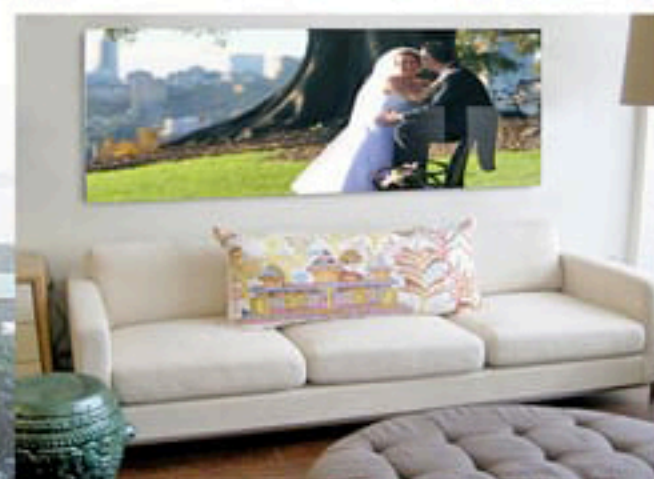

Multi Color Glass Printing is a needed technology to get classic output of glass prints.

Lexy Direct Printing Technology is an excellent alternative of UV Flat bed printer technology and gives superior quality output than such printer.

The price of Lexy Technology Printer is lesser than UV flat bed printers and the running cost is also lesser.

With Lexy Direct Printing Technology, it will be very easy to make Printed Glass Prints with scratch proof and rugged protective polymer coatings.

Lexy Print Transfer Technology will give longer durability, easy application, possibility of printing in pre-installed

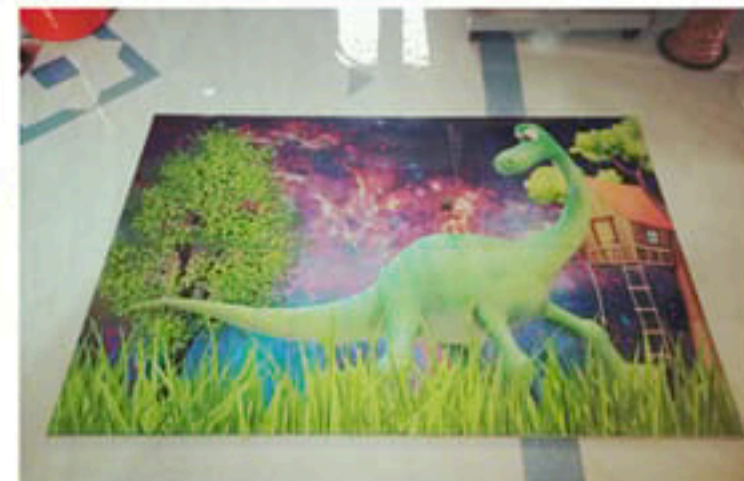

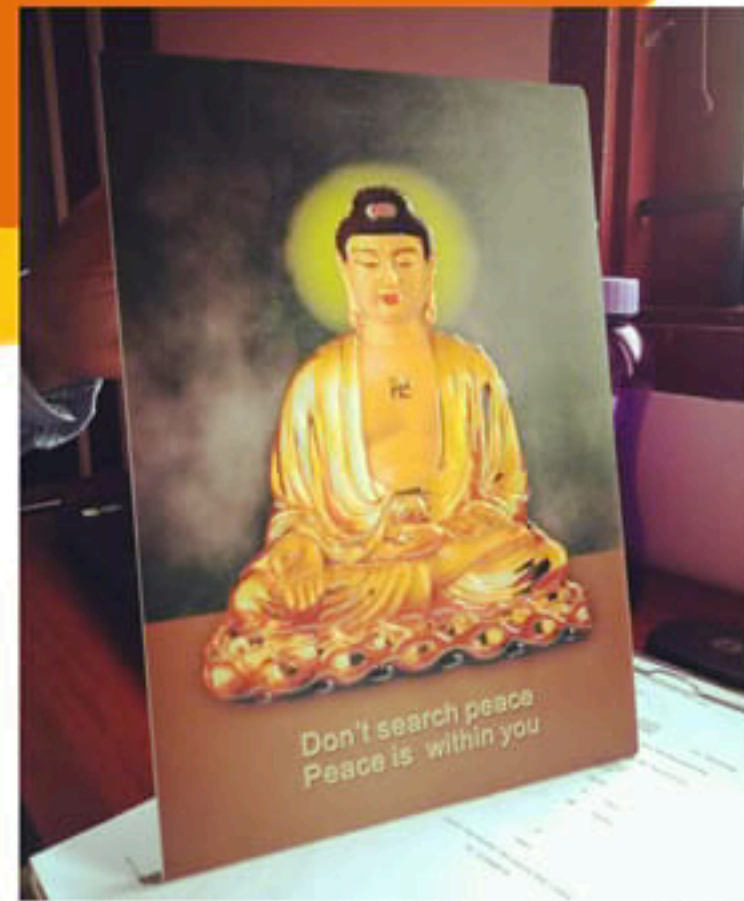

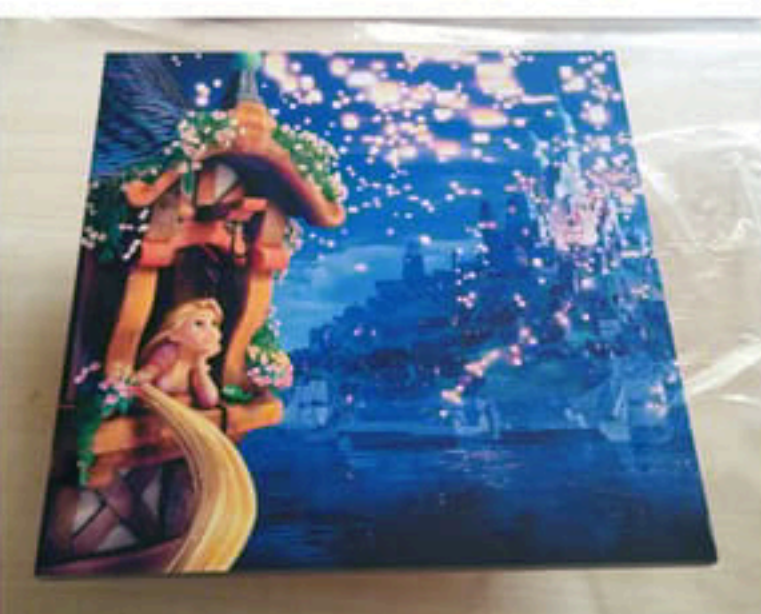

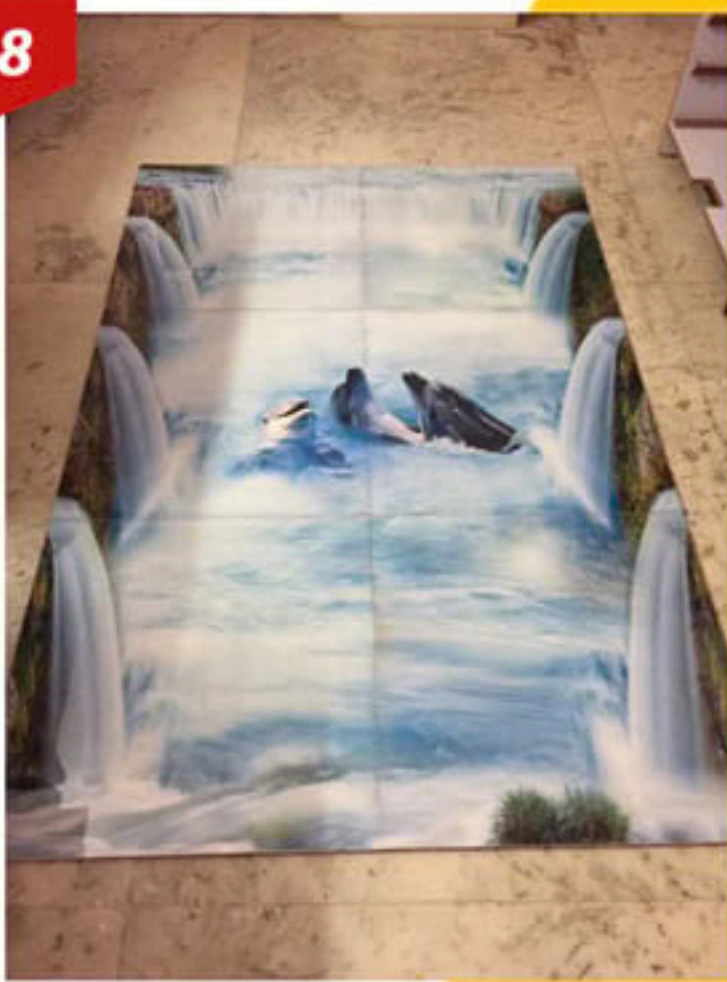

Ceramic Printed Tiles

Lexy Technology facilitates to manufacture excellent range of image, texture, Seamless Pattern Printed Ceramic Tiles.

Lexy Technology enables to print colorful and creative 3D Illusion Images on the ceramic tiles and vitrified tiles.

Since, Lexy technology enables to produce scratch proof and water proof ceramic tiles. Printed Ceramic Tiles will add an excellent quality of range to the existing tiles products.

**What
Can be
Produced?**

Lexy Printing Technology

Lexy is state of the art fine technology, which enables us to print image directly on Granite, Marble, Wood, Tiles and on Glass.

With this printing solution, we can print on surfaces like Granite Stones, Marble Stones without loosing the quality.

Lexy is a newly instrumented technology to print images directly on the material.

Lexy Direct Printing Technology is something special and the resulted output will have stunning results.

Lexy Direct Printing Technology enables us to take the output within a short span of time and with good quality outputs.

Lexy Direct Printing Technology is used for manufacturing Printed granite monuments / memorial stones with excellent quality output and fine glossy finish.

Lexy has three stages of processing, starting from etching the surface of the material, precoating and then transferred the image directly onto the materials gives highly superior transparency, scratch proof nature, water proof, acid proof, solvent proof and so on.

With Lexy Direct Printing Technology, we can print up to any large size without any trouble.

Printed Granite Slab

Granite Slabs has wide applications such as printed granite dining table tops, name boards, sign boards and so on.

Printed Granite Slabs enables to convert the temple artworks in to long durable printed arts.

Printing on Granite Slabs enables to affix granite photo Prints on memorial stones and on monuments.
