## About us

Arihant industrial corporation ltd was incorporated in 1978 with a focus and desire to service the global marketplace with highly innovative products and services. Arihant has since then evolved into a leader in full range of water park equipment and playground equipment manufacturer and supplier. No one knows waterparks better than us. That's because we don't just make them but also operate one of the best waterparks in the country called "The Great Escape".

Our position in the industry speaks about our commitment to quality, engineering excellence and clear understanding of client requirements with in-time completion of projects. We are guided by integrity, dedication, resourcefulness and determination to succeed. Arihant has executed more than 409 projects worldwide in more than 51 countries like USA, UK, France, Australia, Brazil, India etc.

## WHAT WE DO

### Conceptualization

We understand the vision of our clients. Owing to this ability, we conceptualize the entire project such that it not just meets but exceeds our client's expectations.

### Planning

All projects at Arihant are planned keeping in mind the minutest details and requirements of the clients. At this stage, we ensure that any product is customized as per the client's requirements, preferences and constraints.

### Design and Themetization

Our designs adhere to international standards (EN 1069 & ASTM). At this stage we focus on three key areas namely precision, safety and durability. We customize designs that fit your space precisely and maximize your topography.

### Manufacturing

We are 9001:2000 certified. All our products are of international standards (EN 1069 & ASTM) in terms of design, performance and safety manufactured with stringent quality control measures.

### Completion and trials

We not only install our products on the specified location but also execute trials to ensure operation safety before the rides open for visitors.

### After sales service

We have always believed in nurturing and maintaining relationships with our clients post project completions too. Our customer service team helps us achieve this by efficiently assisting the clients in their post installation queries.

### LRTM

We use the LRTM technology which has advantages over conventional hand molding techniques. The RTM process for fiber reinforced composites has recently taken the lead as the most popular closed molding process for low to medium volume application.

The LRTM technology produces an esthetic look and gives a better finish and accuracy to the products.

### Turnkey Projects

Our services are drawn on our extensive experience in water slide projects. At Arihant, we take care of the client's every need right from master planning, feasibility study, selection of contractors to architectural & technical services and recruitment and personnel training. Whatever you need, we are just a call away.

## Our Purpose

"We exist to create Happy Moments"

## Our Goal

We strive to be a globally preferred company in the happiness industry and enlarging stakeholder value by:

- Being principle driven
- Being clients delight
- Being innovative & trendsetting
- Being a great place to work

## Frequently Asked Questions

### 1 . What is the minimum land required for a waterpark ?

40,000 sq feet approximately.

### 2 . What are the other requirements for building a project ?

Arihant will provide a PROJECT MANAGER alongwith a dedicated project management team who will help you in planning and scheduling the whole waterpark plan by selecting the right choice of waterpark product based on location, demographics and feasibility.

### 3 . What is the minimum production time for waterpark equipment ?

It differs from project to project but on an average 30 to 120 days.

### 4 . Arihant products complies to which standards ?

Arihant products complies to EN 1069 & ASTM quality standards.

### 5 . What is the warranty period ?

Arihant warrants for any manufacturing defects of any nature in water park equipment for a period of 1 year. Buyers can also opt for annual maintenance contract services after the warranty period.

### 6 . Allied equipment for the waterpark ?

Arihant can assist you with other activities such as recommendations on vendors based on location and expertise, inflatables, costumes, filters, pumps, theming of whole park etc.

### 7 . How can you expand and enhance your waterpark ?

Arihant provides customised designs of slides and light effects in slides that are unique and attractive which can enhance the experience of your guests.

### 8 . Towers and filters

We design and manufacture galvanised steel tower and also offer filtration plant for waterpark.
